the Design of Effective Homework details a new instructional design approach called Guided Cognition where homework
tasks are designed to guide learners to engage in specific observable cognitive events that are hypothesized to elicit
underlying theoretical cognitive processes that result in learning Outlining the results of twenty six experiments completed
over the course of eight years the book tells a significant story about the generality of Guided Cognition instructional design

questions and tasks **Squaring the Circle** Douglas M. Jesseph, 1999 In 1655 the philosopher Thomas Hobbes claimed he
had solved the centuries old problem of squaring of the circle constructing a square equal in area to a given circle With a
scathing rebuttal to Hobbes's claims the mathematician John Wallis began one of the longest and most intense intellectual
disputes of all time Squaring the Circle is a detailed account of this controversy from the core mathematics to the broader
philosophical political and religious issues at stake Hobbes believed that by recasting geometry in a materialist mold he could
solve any geometric problem and thereby demonstrate the power of his materialist metaphysics Wallis a prominent
Presbyterian divine as well as an eminent mathematician refuted Hobbes's geometry as a means of discrediting his
philosophy which Wallis saw as a dangerous mix of atheism and pernicious political theory Hobbes and Wallis's battle of the
books illuminates the intimate relationship between science and crucial seventeenth century debates over the limits of
sovereign power and the existence of God
