China's Urban Revolution Austin Williams, 2017-10-19 By 2025 China will have built fifteen new supercities each with 25 million inhabitants It will have created 250 Eco cities as well clean green car free people friendly high tech urban centres From the edge of an impending eco catastrophe we are arguably witnessing history's greatest environmental turnaround an urban experiment that may provide valuable lessons for cities worldwide Whether or not we choose to believe the hype there is little doubt that this is an experiment that needs unpicking understanding and learning from Austin Williams The Architectural Review's China correspondent explores the progress and perils of China's vast eco city program describing the complexities which emerge in the race to balance the environment with industrialisation quality with quantity and the liberty of the individual

Konvitz,2015-01-01 An ambitious global study of the state of cities in the early twenty first century their role in society and their contribution to the financial crisis **Cities in the Urban Age** Robert A. Beauregard,2018-03-19 We live in a self proclaimed Urban Age where we celebrate the city as the source of economic prosperity a nurturer of social and cultural diversity and a place primed for democracy We proclaim the city as the fertile ground from which progress will arise Without cities we tell ourselves human civilization would falter and decay In *Cities in the Urban Age* Robert A Beauregard argues that this line of thinking is not only hyperbolic it is too celebratory by half For Beauregard the city is a cauldron for four haunting contradictions First cities are equally defined by both their wealth and their poverty Second cities are simultaneously environmentally destructive and yet promise sustainability Third cities encourage rule by political machines and oligarchies even as they are essentially democratic and at least nominally open to all And fourth city life promotes tolerance among disparate groups even as the friction among them often erupts into violence Beauregard offers no simple solutions or proposed remedies for these contradictions indeed he doesn't necessarily hold that they need to be resolved since they are generative of city life Without these four tensions cities wouldn't be cities Rather Beauregard argues that only by recognizing these ambiguities and contradictions can we even begin to understand our moral obligations as well as the clearest paths toward equality justice and peace in urban settings **Global Cities and Global Order** Simon Curtis,2016 This volume investigates the changing nature of cities in the international system and their increasing prominence in global governance and global order *Cities Without Capitalism* Hossein Sadri,Senem Zeybekoglu,2021-07-22 This book explores the interconnections between urbanization and capitalism to examine the current condition of cities due to capitalism It brings together interdisciplinary

insights from leading academics activists and researchers to envision progressive anti capitalist changes for the future of cities The exploitative nature of capitalist urbanization as seen in the manifestation of modern cities has threatened and affected life on Earth in unprecedented ways This book unravels these threats to ecosystems and biodiversity and addresses the widening gap between the rich and the poor It considers the future impacts of the capitalist urbanization on the planet and the generations to come and offers directions to imagine and build de capitalised and de urbanised cities to promote environmental sustainability Written in lucid style the chapters in the book illustrate the current situation of capitalist urbanization and expose how it exploits and consumes the planet It also looks at alternative habitat practices of building autonomous and ecological human settlements and how these can lead to a transformation of capitalist urbanization The book also includes current debates on COVID 19 pandemic to consider post pandemic challenges in envisioning a de capitalised eco friendly society in the immediate future It will be useful for academics and professionals in the fields of sociology urban planning and design and urban studies
