Cities From Scratch Poverty And Informality In Urban Latin America:

Cities From Scratch Brodwyn Fischer, Bryan McCann, Javier Auyero, 2014-02-28 This collection of essays challenges long entrenched ideas about the history nature and significance of the informal neighborhoods that house the vast majority of Latin America's urban poor. Until recently scholars have mainly viewed these settlements through the prisms of crime and drug related violence, modernization and development theories, populist or revolutionary politics, or debates about the cultures of poverty. Yet shantytowns have proven both more durable and more multifaceted than any of these perspectives foresaw. Far from being accidental offshoots of more dynamic economic and political developments, they are now a permanent and integral part of Latin America's urban societies, critical to struggles over democratization, economic transformation, identity politics, and the drug and arms trades. Integrating historical, cultural, and social scientific methodologies, this collection brings together recent research from across Latin America from the informal neighborhoods of Rio de Janeiro and Mexico City, Managua, and Buenos Aires. Amid alarmist exposés, *Cities from Scratch* intervenes by considering Latin American shantytowns at a new level of interdisciplinary complexity. Contributors: Javier Auyero, Mariana Cavalcanti, Rato Diniz, Emilio Duhau, Sujatha Fernandes, Brodwyn Fischer, Bryan McCann, Edward Murphy, Dennis Rodgers. **Cities From Scratch**

Introduction to Cities Xiangming Chen, Anthony M.

Orum, Krista E. Paulsen, 2018-04-30 The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, *Introduction to Cities* examines the study of cities through two central concepts: that cities are places where people live, form communities, and establish their own identities; and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from

an historical perspective right through to the most recent theoretical developments The authors offer a balanced account of life in cities and explore both positive and negative themes In addition the text takes a global approach with examples ranging from Berlin and Chicago to Shanghai and Mumbai The book is extensively illustrated with updated maps charts tables and photographs This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces exploring power and politics in an urban context It contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to European Latin American and African cities Revised and updated Introduction to Cities provides a complete introduction to the history evolution and future of our modern cities *The Interwar World* Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history **Real Estate and Global Urban History** Alexia Yates, 2021-08-26 Capitalist private property in land and buildings real estate is the ground of modern cities materially politically and economically It is foundational to their development and core to much theoretical work on the urban environment It is also a central pressing matter of political contestation in contemporary cities Yet it remains largely without a history This Element examines the modern city as a propertied space defining real estate as a technology of dis possession and using it to move across scales of analysis from the local spatiality of particular built spaces to the networks of legal political and economic imperatives that constitute property and operate at national and international levels This combination of territorial embeddedness with more wide ranging institutional relationships charts a route to an urban history that allows the city to speak as a global agent and artefact without dispensing with the role of states and local

circumstance **Making the Modern Slum** Sheetal Chhabria, 2019-12-06 In the late nineteenth and early twentieth centuries Bombay was beset by crises such as famine and plague Yet rather than halting the flow of capital these crises served to secure it In colonial Bombay capitalists and governors Indian and British alike used moments of crisis to justify interventions that delimited the city as a distinct object and progressively excluded laborers and migrants from it Town planners financiers and property developers joined forces to secure the city as a space for commerce and encoded shelter types as legitimate or illegitimate By the early twentieth century the slum emerged as a particularly useful category of stigmatization that would animate city making projects in subsequent decades Sheetal Chhabria locates the origins of Bombay's now infamous slum problem in the broader histories of colonialism and capitalism She not only challenges assumptions about colonial urbanization and cities in the global south but also provides a new analytical approach to urban history *Making the Modern Slum* shows how the wellbeing of the city rather than of its people became an increasingly urgent goal of government positioning agrarian distress famished migrants and the laboring poor as threats to be contained or excluded *The Spectacular Favela* Erika Robb Larkins, 2015-05 This book examines the political economy of violence in the Rio de Janeiro favela of Rocinha Based on over two years of research and residence in the community it offers an ethnographic account of how entangled forms of violence become essential forces shaping everyday social relations in the favela The first part of the book shows how armed actors drug traffickers and police use spectacle to perform power Yet despite the prevalence of physical violence the favela has itself become a valuable global brand consumed in disembodied fashion through media and in embodied fashion through tourism Exploring media and favela tourism the second part of the book demonstrates how the social relationships that arise from ongoing favela violence have a direct relationship to the market economy Provided by publisher **Informal Metropolis** David Yee (Historian of Latin America), 2024 Informal Metropolis uncovers how a former lake bed on the edge of Mexico City grew into the world's largest shantytown Ciudad Nezahualcōtli and rethinks the relationship between urban space and inequality in twentieth century Mexico **The SAGE Handbook of Historical Geography** Mona Domosh, Michael Heffernan, Charles W. J. Withers, 2020-11-25 Historical geography is an active theoretically informed and vibrant field of scholarly work within modern geography with strong and constantly evolving connections with disciplines across the humanities and social sciences Across two volumes The SAGE Handbook of Historical Geography provides you with an international and cross disciplinary overview of the field presenting chapters that examine the history present condition and future potential of the discipline in relation to recent developments and research **Building the Inclusive City** Nilson Ariel Espino, 2015-03-24 Urban segregation is one of the main challenges facing urban development around the globe The usual outcome of many urban development patterns is an unequal social geography with the urban poor living in large clusters that are remote isolated dangerous or unhealthy The result is inequality in a number of dimensions of urban life from deficient urban access services or infrastructure to social

isolation neighbourhood violence and lack of economic opportunity This book brings together debates on ethnic and economic segregation combining theory and practical solutions to create a guide for those trying to understand and address urban segregation in any part of the world and integrate ameliorating policies to contemporary urban development agendas
