Instructions: Only apply decals after construction and painting of the model is complete. Decals have been pre-coated with a fixative so additional coating is unnecessary. Cut out the decal components as required with sharp scissors. Place decal in warm water for a few seconds (up to a minute may be needed for larger decals). Let decal sit out of the water for a little while to loosen further from the backing. Place decal onto model, and using a wet brush (recommended) or other smooth, non-sharp object carefully slide the decal onto model. Position decal as desired. Brush additional water onto decal (and under if possible) for improved "sliding". Absorb excess water with dry paper towel. Allow decal to sit and dry.

- *It is recommended to fill in all windows and outlines for doors and other details on the model during its assembly in case there is any discrepancy between the decals and the kit.
- *Avoid touching decals with your bare hands until model is clear coated to avoid leaving fingerprints, dirt and oils on them.
- *Ensure surfaces are clean prior to applying decals over them.
- *Use of Microset and Microsol or similar decal solutions is highly recommended.
- *Clear coating model after all decals are applied is highly recommended.

Best of luck in your modelling endeavours,
and we hope you enjoy our decals,
