J. I. Case (David Brown) Shop Manual, *Farm Tractors* Bill. Butterworth, 2012-12-06 Despite the fact that the farmer spends more on machinery than anything else except the land and despite the fact that he spends more on tractors than on any other machine there are few books on the choice and operation of tractors to fit modern farming conditions Most of this book is about farming and how to fit tractors to the individual situation Those sections are completely unbiased and Case are happy to sponsor such a book in the wider interests of sensible more productive and safer use of tractors and machinery Where the Company's views are expressed it is clearly stated as such This is mainly in the area of design detail and then only for the sake of being concise and brief The first part of the book is concerned with relating the needs of the individual farm to specific details of tractor performance Later chapters deal with policy on size numbers and replacement This section is a major development specifically about tractors It is developed from the author's work *Farm Mechanisation* for PRL which deals with machinery in the wider sense Later chapters of this book are related to professionalism in operation maintenance and care
