

General Functions (All Models)

The functions and operations described in this section can be used in all of the modes.

Auto Return Features

- The watch returns to the Timekeeping Mode automatically if you do not perform any button operation for two or three minutes in the Alarm Mode.
- If you leave the watch in a setting mode (with flashing digits) for two or three minutes without performing any operation, the watch will exit the setting mode automatically.

Initial Screens

When you enter the World Time or Alarm Mode, the data you were viewing when you last exited the mode appears first.

Scrolling

The $\leftarrow$ and $\rightarrow$ buttons are used in the setting mode to scroll through data. In most cases, holding down these buttons during a scroll operation scrolls through the data at high speed.

E-40

Configuring Home City Settings

There are two Home City settings: actually selecting the Home City, and selecting either standard time or daylight saving time (DST).

To configure Home City settings

- In the Timekeeping Mode, hold down $\leftarrow$ for about two seconds until **ADJ** appears in the right digital dial. When you release $\leftarrow$, the city code and city name will scroll across the right digital dial. This is the setting mode.
 - The watch will exit the setting mode automatically if you do not perform any operation for about two or three minutes.

- For details about city codes, see the "City Code Table" at the back of this manual.
- Whenever you enter a setting mode, the analog hands will automatically move to positions that allow easier viewing of the digital data.

E-40

- Note that you cannot switch between standard time and daylight saving time (DST) while UTC is selected as your Home City.
- After the setting is the way you want, press $\rightarrow$ to return to the Timekeeping Mode.
 - The **DST** indicator appears to indicate that Daylight Saving Time is turned on.
 - Exiting a setting mode will normally cause the hands to return to regular Timekeeping Mode. However, if you manually move the hands (page E-78) and then enter a setting mode, they will not return to regular Timekeeping Mode automatically when you exit the setting mode. In this case, you will need to return the hands to their normal positions manually (page E-80).

Note

- After you specify a city code, the watch will use UTC* offsets in the World Time Mode to calculate the current time for other time zones based on the current time in your Home City.
- * Coordinated Universal Time, the world-wide scientific standard of timekeeping. The reference point for UTC is Greenwich, England.

E-41

- Use $\rightarrow$ to cycle through the DST settings in the sequence shown below.

- The Auto DST (**AUTO**) setting will be available only when a city code that supports time calibration signal reception (page E-21) is selected as the Home City. While Auto DST is selected, the DST setting will be changed automatically in accordance with time calibration signal data.
- After the setting is the way you want, press $\rightarrow$ to return to the Timekeeping Mode.
 - The **DST** indicator appears to indicate that Daylight Saving Time is turned on.

E-40

Configuring Current Time and Date Settings Manually

You can configure current time and date settings manually when the watch is unable to receive a time calibration signal.

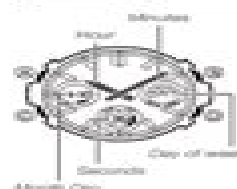

To change the current time and date settings manually

- In the Timekeeping Mode, hold down $\leftarrow$ for about two seconds until **ADJ** appears in the right digital dial. When you release $\leftarrow$, the city code and city name will scroll across the right digital dial. This is the setting mode.
 - Whenever you enter a setting mode, the analog hands will automatically move to positions that allow easier viewing of the digital data.

E-41

Timekeeping

Use the Timekeeping Mode to set and view the current time and date.

- If you have an alarm time set, the right digital dial will change to show a countdown of the time 50 minutes until the alarm time is reached.
- When viewing a digital dial, you can move the analog hands for an unobstructed view.
- Press $\rightarrow$ to toggle the left digital dial between month/day and hour/minutes.

E-41

DST indicator

- Use $\leftarrow$ (East) and $\rightarrow$ (West) to scroll through the city codes in the right digital dial until the one you want to use as your Home City is displayed.
- Press $\rightarrow$ so the DST indicator is flashing in the left digital dial, which indicates the DST setting mode.

- The Auto DST (**AUTO**) setting will be available only when a city code that supports time calibration signal reception (page E-21) is selected as the Home City. While Auto DST is selected, the DST setting will be changed automatically in accordance with time calibration signal data.

E-40

- Selecting some city codes automatically makes it possible for the watch to receive the time calibration signal for the corresponding area. See page E-21 for details.

To change the Daylight Saving Time (summer time) setting

DST indicator

- In the Timekeeping Mode, hold down $\leftarrow$ for about two seconds until **ADJ** appears in the right digital dial. When you release $\leftarrow$, the city code and city name will scroll across the right digital dial. This is the setting mode.
 - Whenever you enter a setting mode, the analog hands will automatically move to positions that allow easier viewing of the digital data.
- Press $\rightarrow$ to enter the DST setting mode.

E-40

- Exiting a setting mode will normally cause the hands to return to regular Timekeeping Mode. However, if you manually move the hands (page E-78) and then enter a setting mode, they will not return to regular Timekeeping Mode automatically when you exit the setting mode. In this case, you will need to return the hands to their normal positions manually (page E-80).

E-41

- Press $\rightarrow$ to move the flashing in the sequence shown below to select the other settings.

- The following steps explain how to configure timekeeping settings only.
