examples The contributors to this volume use a variety of research and policy frameworks to explore how creation and access to green spaces in extreme situations might contribute to resistance recovery and resilience of social ecological systems

Urban Gardening as Politics Chiara Tornaghi, Chiara Certomà, 2018-07-11 While most of the existing literature on community gardens and urban agriculture share a tendency towards either an advocacy view or a rather dismissive approach on the grounds of the co optation of food growing self help and voluntarism to the neoliberal agenda this collection investigates and reflects on the complex and sometimes contradictory nature of these initiatives It questions to what extent they address social inequality and injustice and interrogates them as forms of political agency that contest transform and re signify the urban Claims for land access the right to food the social benefits of city greening community conviviality and insurgent forms of planning are multiplying within policy advocacy and academic literature and are becoming increasingly manifested through the practice of urban gardening These claims are symptomatic of the way issues of social reproduction intersect with the environment as well as the fact that urban planning and the production of space remains a crucial point of an ever evolving debate on equity and justice in the city Amid a mushrooming over positive literature this book explores the initiatives of urban gardening critically rather than apologetically The contributors acknowledge that these initiatives are happening within neoliberal environments which promote among other things urban competition the dismantling of the welfare state the erasure of public space and ongoing austerity These initiatives thus can either be manifestation of new forms of solidarity political agency and citizenship or new tools for enclosure inequality and exclusion In designing this book the progressive stance of these initiatives has therefore been taken as a research question rather than as an assumption The result is a collection of chapters that explore potentials and limitations of political gardening as a practice to envision and implement a more sustainable and just city

City Bountiful Laura J. Lawson, 2005-05-30 The social history of American cities would not be complete without a full account of the rise of community open spaces Lawson does exactly this by providing a compelling and poetic account of the history and making of urban gardens Combining solid scholarship with engaging images of the gardens and stories of their makers this book sheds new light on the value of urban open space More important it explains why community gardens need to stand alongside city parks as permanent open spaces Essential reading for community developers and landscape architects as well as anyone who ventures outside enthusiasm and shovel in hand to improve their local environment Mark Francis author of *Urban Open Space* and *Village Homes* The definitive history of the past hundred years of America s experience with community gardens A labor of love by a garden activist the book appears at a most appropriate time today our city dwellers and suburbanites are retreating onto carpets of passive open space tended by homeowner associations and lawn care outfits Lawson thoughtfully analyzes the weaknesses of community gardens when used as a response to social crises and by contrast investigates community gardens as an alternative to today s managed care of open space Her history clearly presents a way of community living that we can elect if we choose her wisdom Sam Bass
