Comprehensive River Basin Development The Tennessee Valley Authority World Bank Technical Papers:

Comprehensive River Basin Development Barbara A. Miller, Richard B. Reidinger, 1998-01-01 The Tennessee Valley Authority TVA in the United States represents one of the few successful examples of comprehensive river basin development Established to guide the development of the resources within the Tennessee River Basin TVA operates a wide variety of water power economic development and environmental programs within the region This report presents an overview of TVA's growth and development its institutions and its operational programs

Assessing Markets for Renewable Energy in Rural Areas of Northwestern China Tuntivate Voravate, Douglas F. Barnes, V. Susan Bogach, 2000 This reports on a detailed market study of rural areas in China without access to electricity from the local or national grid It obtained basic socio economic data on households with and without photovoltaic PV systems and used the data to determine the market potential for PV systems in such areas

Communal Infrastructure in Slovenia Mojmir Mrak, 2000 Annotation Although growth of infrastructure services in Vietnam since the late 1980s greatly facilitated rapid growth in exports and gross domestic product GDP Vietnam's infrastructure still suffers from a number of major inadequacies This report has three main objectives to describe and assess the current status and performance of key infrastructure sectors to describe and assess the policy regulatory and institutional environment for involving the private sector in those sectors and to help policymakers in framing future reform and development strategies and to assist potential private sector investors in assessing investment opportunities

Economic Research on the Determinants of Immigration George J. Borjas, 1999-01-01 This publication summarizes some of the key research findings from current literature and applies the lessons from it to the potential migration problem faced by countries in the EU Its main objective is to present a review of existing economic theory and empirical evidence to evaluate the likelihood of migration flows from acceding or neighboring countries toward the current EU member states This publication is a Technical Paper sponsored by the Poverty Reduction and Economic Management Network of the World Bank's Europe and Central Asia Division It is part of a comprehensive series regarding the many important factors that influence European Union EU accession in the Central and East European countries CEEC The topics in the series cover both the social and economic aspects of accession across a broad range of sectors The series also provides background information for specific acceding countries These publications will be of interest to EU member and candidate countries their ministries and any one studying the accession issue

Ready for Europe Barbara Nunberg, 2000-01-01 As the ongoing political and economic transition in the Central and Eastern Europe countries CEE moves into the next century the most advanced countries in the region are preparing to deal with their prospective entry into the European Union More a process than an event joining the EU is likely to place heightened demands on public administrations throughout the region To assist these countries with their efforts the Bank conducted a study of the regions The results of that study are included in this volume Ready for Europe specifies and clarifies the administrative requirements of accession The author uses in depth

case studies for three pre accession countries Estonia Hungary and the Czech Republic to make these specifications The book defines the performance level countries will need to attain for a range of administrative tasks so the countries may reach a minimal threshold for EU membership It applies selected standards to determine each country s readiness for accession and for the longer term transition agenda The author focuses on these three critical areas of administrative performance in the context of EU accession How advanced is the development of a politically neutral professional human resource cadre in the civil service Do countries have the necessary institutional infrastructure at the government s core that is cabinet level to formulate and coordinate policymaking in an efficient and democratic manner How well are the dedicated institutional structures and processes established to shepherd countries through the accession process working

Management of Water Resources Musa Asad,1999-01-01 Although procedures for pricing retail distribution have been established for a long time methods for pricing bulk or wholesale water supplies are still evolving How to finance the infrastructure and service of bulk water supply and how to use pricing to achieve efficient allocation and use of water as a resource are the central issues that emerge from discussions about bulk water pricing Efficiency will lead to allocating water resources better reducing water losses caused by poor maintenance of the supply systems and increased monitoring of water quality At first glance Brazil may not appear to be a relevant country from which to draw lessons in distributing scarce water resources since it contains 12 percent of the world s fresh water supply However with its vast territory and issues of regional drought and population explosion Brazil provides a unique environment in which to demonstrate how adequate pricing of bulk water on a regional level can help allocate water efficiently This paper offers a framework for bulk water pricing reform and examines the lessons from recent analytical work and practice in Brazil as well as relevant international experience It then offers recommendations for the development of both water pricing and allocation policies to facilitate continued implementation of bulk water pricing in Brazil

An Environmental Study of Artisanal, Small, and Medium Mining in Bolivia, Chile, and Peru Gary McMahon,1999-01-01 Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years a figure which increases to 500 percent if Chile is excluded Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors In light of this legislation this report examines the environmental effects of artisanal small and medium mines in three Latin American Countries Bolivia Chile and Peru Four of the most important elements to be considered are The age of the mine Management of tailings The heterogeneity of the artisanal and small mine sectors The increasing need to take cultural considerations into account in the decision making process The paper contains results of the studies on the various mining sectors strategy and policy recommendations and country study summaries

Rural Development Strategy
Csaba Csáki,Laura Tuck,2000-01-01 With the larger role that the agricultural sector plays in the Eastern Europe and Central Asian ECA region emphasis must be placed on the sector s sustained growth and prosperity The Bank strategy for rural

development in the ECA region during the early phase of transition emphasized the reform of agricultural policies and assistance in privatizing restructuring and rebuilding agriculture and agro industrial complexes In retrospect it can be seen that the ECA countries concerned made the right choice when they set their objective to transform their socialized agriculture into a private ownership and market based system Given the developments of the past decade it is clear however that the initial expectations for the outcomes of such reforms were overly optimistic The transition process in agriculture is far more complex than originally envisaged by both the countries themselves and the international community including the Bank Increased social problems and alarming growth of poverty have added a new unexpected dimension to the transition process As the analysis indicates the region s rural economy is still struggling to adjust to new economic realities and this will require further refinement and adjustment of the Bank s approach as well This volume based on an overview of recent regional developments summarizes the revised World Bank assistance strategy for rural development in the ECA region

EU Investment Grants Review Iain Begg, 1999-01-01 This study is the first of a three stage research program that aims to investigate institutional arrangements for local and regional capital investment in selected CEECs and assess whether these arrangements provide appropriate signals to economic agents with regard to EU accession This publication is a Technical Paper sponsored by the Poverty Reduction and Economic Management Network of the World Bank s Europe and Central Asia Division It is part of a comprehensive series regarding the many important factors that influence European Union EU accession in the Central and East European countries CEEC The topics in the series cover both the social and economic aspects of accession across a broad range of sectors The series also provides background information for specific acceding countries These publications will be of interest to EU member and candidate countries their ministries and any one studying the accession issue

DeMISTifying MIS Luc Lecuit, 1999-01-01 Managers are often far from the real action so they need something that will tell them what is going on Luckily the rapid evolution of tools for collecting analyzing and diffusing information has greatly improved our ability to manage from a distance However the speed of technological change means that changes in management practices and tools are inescapable Development of Management Information Systems MIS for social funds has become essential due to some of the characteristics unique to these types of projects or organizations Among these unique characteristics are the need for transparency and efficiency because of the highly visible nature of the activities These guidelines define MIS and underscore its importance They also outline specific tools to assist in selection of an MIS and summarize its design and implementation These guidelines are meant to be a practical tool to help those who are setting up or managing a social fund navigate in MIS waters Technical jargon is kept to a minimum and a glossary of technical terms is provided to assist readers who do not have a technical background However special Technical Boxes have been included for the experts in this field
