Answer (A) is correct.

A control is any action taken by management to enhance the likelihood that established goals and objectives will be achieved. Controls include segregation of duties to reduce the risk that any person may be able to perpetrate and conceal errors or fraud in the normal course of his or her duties. Different persons should authorize transactions, record transactions, and maintain custody of the assets associated with the transaction. Independent reconciliation of bank accounts is necessary for good internal control.

- D. Individual department managers use prenumbered forms to order merchandise from vendors. - Answer (C) is correct.

Accounting for payables is a recording function. The matching of the supplier's invoice, the purchase order, and the receiving report (and usually the purchase requisition) should be the responsibility of the accounting department. These are the primary supporting documents for the payment voucher prepared by the accounts payable section that will be relied upon by the chief financial officer in making payment.
