Complex Predicates Cross Linguistic Perspectives On Event Structure:

Complex Predicates Mengistu Amberber, Brett Baker, Mark Harvey, 2010-04-22 Complex predicates are multipredicational but monoclausal structures They have proven problematic for linguistic theory particularly for proposed distinctions between the lexicon morphology and syntax This volume focuses on the mapping from morphosyntactic structures to event structure and in particular the constraints on possible mappings The volume showcases the coverb construction a complex predicate construction which though widespread has received little attention in the literature The coverb construction contrasts with more familiar serial verb constructions The coverb construction generally maps only to event structures like those of monomorphemic verbs whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs The volume coverage is truly cross linguistic including languages from Australia Papua New Guinea Southeast Asia the Indian subcontinent East Africa and North America The volume establishes a new arena of research in event structure syntax and cross linguistic typology

Perspectives on Language Structure and Language Change Lars Heltoft, Iván Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15 This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure reanalysis actualization and indexicality Reanalysis is a part of ongoing everyday language use a process through which language is reproduced and changed Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society Indexicality covers the way in which parts of a linguistic system can point to other parts of the system both syntagmatically and paradigmatically The inclusion of indexicality leads to fine grained analysis in morphology word order and constructional syntax

The Oxford Handbook of Ethiopian Languages Ronny Meyer, Bedilu Wakjira, Zelealem Leyew, 2023-05-04 This handbook provides a comprehensive account of the languages spoken in Ethiopia exploring both their structures and features and their function and use in society The first part of the volume provides background and general information relating to Ethiopian languages including their demographic distribution and classification language policy scripts and writing and language endangerment Subsequent parts are dedicated to the four major language families in Ethiopia Cushitic Ethiosemitic Nilo Saharan and Omotic and contain studies of individual languages with an initial introductory overview chapter in each part Both major and less documented languages are included ranging from Amharic and Oromo to Zay Gawwada and Yemsa The final part explores languages that are outside of those four families namely Ethiopian Sign Language Ethiopian English and Arabic With its international team of senior researchers and junior scholars The Oxford Handbook of Ethiopian Languages will appeal to anyone interested in the languages of the region and in African linguistics more broadly

The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a quarter of the world's population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic

investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed

Support-verb constructions in the corpora of Greek Victoria B. Fendel, 2024-11-07 This volume brings together corpora that span more than 3 000 years of the history of the Greek language from Itz s chapter on the proto language to Giouli s chapter on the modern language The authors take wider or narrower approaches with regard to the form and function of the type of construction that they include in the group of support verb constructions while all would agree that English to take initiative is a support verb construction opinions differ on English to take wing The chapters reflect a fascinating diversity of approaches to support verb constructions including Natural Language Processing Comparative Philology New Testament Exegesis Coptology and General Linguistics The volume is structured along the three interfaces that support verb constructions sit on the syntax lexicon the syntax semantics and the syntax pragmatics interfaces We finish with four concrete avenues for further research Faced with the diversity of approaches and the magnitude of disagreements arising from them when working with as internally diverse a group of constructions as support verb constructions we strive for in varietate unitas

The Handbook of Lexical Functional Grammar Mary Dalrymple, 2023-12-14 Lexical Functional Grammar LFG is a nontransformational theory of linguistic structure first developed in the 1970s by Joan Bresnan and Ronald M Kaplan which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information related by means of functional correspondences This volume has five parts Part I Overview and Introduction provides an introduction to core syntactic concepts and representations Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions Part III Grammatical modules and interfaces provides an overview of LFG work on semantics argument structure prosody information structure and morphology Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics learnability psycholinguistics and second language learning Part V Formal and computational issues and applications provides an overview of computational and formal properties of the theory implementations and computational work on parsing translation grammar induction and treebanks Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families The final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches

Languages of Mainland Southeast Asia N.J.

Enfield, Bernard Comrie, 2015-03-30 The studies in this book represent the rich diverse and substantial research being conducted today in the linguistics of Mainland Southeast Asia The chapters cover a broad scope Several studies address questions of language relatedness often challenging conventional assumptions about the status of language contact as an explanatory factor in accounting for linguistic similarities Several address the question of Mainland Southeast Asia as a linguistic area exploring new ways to imagine and define the boundaries and indeed the boundedness of a Mainland Southeast Asia area Two contributions rethink the received notion of the sesquisyllable with new empirical and theoretical angles And a set of chapters explores topics in the morphology and syntax of the region s languages sometimes challenging orthodox assumptions and claims about what a typical language of Mainland Southeast Asia is like Written by leading researchers in the field and with a substantial overview of current knowledge and new directions by the volume editors N J Enfield and Bernard Comrie this book will serve as an authoritative source on where the linguistics of Mainland Southeast Asia is at and where it is heading

The Languages and Linguistics of Africa Tom Güldemann, 2018-09-10 This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa the continent with the largest number of languages in the world It covers the major domains of linguistics offering both a representative picture of Africa s linguistic landscape as well as new and at times unconventional perspectives The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics

Noun-Based Constructions in the History of Portuguese and Spanish Patrícia Amaral, Manuel Delicado Cantero, 2022-04-28 This book explores syntactic and semantic change in three types of construction in Spanish and Portuguese i complex determiner phrases with clausal adjunction *el hecho de* or *o facto de* ii complex prepositions complementizers and complex connectives *sin embargo de* *sem embargo de* *so b pena de* and iii complex predicates containing light verbs *dar consejo* *conselho de* While these constructions are syntactically different they are all clause taking complex expressions containing a noun followed by the functional preposition *de* of This book is the first work to use a systematic comparative corpus study to explore these expressions together this approach allows individual changes to be distinguished from general changes as well as emphasizing the chronological clustering of changes that involve complex constructions in both languages By studying mechanisms of language change and their outcomes in two sister languages Patrícia Amaral and Manuel Delicado Cantero address questions such as How do complex constructions evolve How does the meaning of the noun change when considered in isolation and when compared to the meaning of the whole construction And how do syntactic categories change over time This study of two closely related languages reveals distinct developments occurring in parallel and provides a crucial test case for theories of language change

Granularity in the Verbalization of Events and Objects Katerina Stathi, 2023-08-15 The study departs from the observation that in

expressing ideas some languages encode more details than others It investigates whether languages encode events and or objects at a coarse grained e g put glass as opposed to a fine grained e g lay wine glass level systematically The level of detail is termed granularity which is viewed as a cline from fine grained semantic specificity to coarse grained meaning semantic generality Four languages are investigated German English Greek and Turkish The study draws on elicited data from a naming task The verbalization of events is based on event and object descriptions in selected semantic domains The results reveal significant granularity effects between languages and language types satellite framed vs verb framed The study is relevant for scholars interested in linguistic typology lexical and semantic typology contrastive linguistics event representation psycholinguistics and cognitive semantics
