

The background of the cover is a stylized illustration of a city skyline. It features several skyscrapers in shades of blue and grey. The most prominent building is a tall, blue skyscraper with a pointed top, resembling the Willis Tower. Other buildings of varying heights and colors are visible in the background. The sky is a light, pale blue.

L.C. Hollaway,2001-07-12 In recent years the fabrication technologies for the production of advanced polymer composites have been revolutionised by sophisticated manufacturing techniques These methods have enabled polymer composite materials to produce good quality laminates with minimal voids and accurate fibre alignment This book familiarises and provides a background to the understanding and use of advanced polymer composites in the civil infrastructure numerous examples have been provided to illustrate the use and versatility of the material Furthermore the book discusses the current fabrication techniques design methods and formulae for the design of structural composite systems In addition it discusses the fundamentals of geosynthetics used in geotechnical engineering The book introduces the fibres and matrices that are used to manufacture composites their mechanical and in service properties and their long term loading characteristics all these properties are specifically associated with the construction industry The chapters then discuss the design aspects for all composite units as well as systems used for the renewal of civil infrastructure Finally the book demonstrated the unique possibilities of combining composites with conventional materials to form units in which the various materials making up the unit are loaded in the mode that specifically suits their mechanical characteristics *Recent Progress in Steel and Composite Structures* Marian A.
