Proceedings of the Ninth Annual ACM-SIAM Symposium on Discrete Algorithms Howard Karloff, 1998-01-01 This symposium is jointly sponsored by the ACM Special Interest Group on Algorithms and Computation Theory and the SIAM Activity Group on Discrete Mathematics *P, NP, and NP-Completeness* Oded Goldreich, 2010-08-16 The focus of this book is the P versus NP Question and the theory of NP completeness It also provides adequate preliminaries regarding computational problems and computational models The P versus NP Question asks whether or not finding solutions is harder than checking the correctness of solutions An alternative formulation asks whether or not discovering proofs is harder than verifying their correctness It is widely believed that the answer to these equivalent formulations is positive and this is captured by saying that P is different from NP Although the P versus NP Question remains unresolved the theory of NP completeness offers evidence for the intractability of specific problems in NP by showing that they are universal for the entire class Amazingly enough NP complete problems exist and furthermore hundreds of natural computational problems arising in many different areas of mathematics and science are NP complete **Graphs and Algorithms** R. Bruce

Richter, 1989 This volume contains the proceedings of the AMS IMS SIAM Joint Summer Research Conference on Graphs and Algorithms held in 1987 at the University of Colorado in Boulder The purpose of the conference was to foster communication between computer scientists and mathematicians for recent work in graph theory and related algorithms has relied on increasingly sophisticated mathematics Wagner's Conjecture self adjusting data structures graph isomorphism and various embedding and labelling problems in VLSI are examples of the kinds of questions now facing the field With around 65 participants the conference brought out the depth and diversity of current research in this area The wide range of topics covered in this volume demonstrates the vitality of the activity in both mathematics and computer science and captures the diversity and excitement of the conference **Performance Limits in Communication Theory and Practice** J.K.

Skwirzynski, 2012-12-06 Proceedings of the NATO Advanced Study Institute on Performance Limits in Communication Theory and Practice Il Ciocco Castelveccchio Pascoli Tuscany Italy July 7 19 1986 **Graph-Theoretic Concepts in Computer**

Science Petr Kolman, Jan Kratochvíl, 2011-12-01 This book constitutes the revised selected papers of the 37th International Workshop on Graph Theoretic Concepts in Computer Science WG 2011 held at Tepl Monastery Czech Republic in June 2011. The 28 revised papers presented were carefully reviewed and selected from 52 submissions. The workshop aims at merging theory and practice by demonstrating how concepts from graph theory can be applied to various areas in computer science and by extracting new graph theoretic problems from applications. Fun with Algorithms Pierluigi Crescenzi, Giuseppe Prencipe, Geppino Pucci, 2007-06-27 This book constitutes the refereed proceedings of the 4th International Conference on Fun with Algorithms FUN 2007 held in Castiglione della Pescaia Italy in June 2007. It details the use, design and analysis of algorithms and data structures focusing on results that provide amusing, witty but nonetheless original and scientifically profound contributions to the area. **Studies in Complexity and Cryptography** Oded Goldreich, 2011-08-03 Paying witness to the author's thirty-year career in science, these high-quality papers, some co-written with colleagues, reflect his professional range covering material from average-case complexity to derandomization and probabilistically checkable proofs.
