The Unreasonable Virtue of Fly Fishing Mark Kurlansky, 2021-03-02 National Outdoor Book Award Winner for Outdoor Literature From the award winning bestselling author of Cod the irresistible story of the science history art and culture of the least efficient way to catch a fish Fly fishing historian Mark Kurlansky has found is a battle of wits fly fisher vs fish and the fly fisher does not always or often win The targets salmon trout and char and for some bass tarpon tuna bonefish and even marlin are highly intelligent athletic animals The allure Kurlansky learns is that fly fishing makes catching a fish as difficult as possible The flies can be beautiful and intricate some made with over two dozen pieces of feather and fur the cast is a matter of grace and rhythm with different casts and rods yielding varying results Kurlansky is known for his deep dives into specific subjects from cod to oysters to salt But he spent his boyhood days on the shore of a shallow pond Here where tiny fish weaved under a rocky waterfall he first tied string to a branch dangled a worm into the water and unleashed his passion for fishing Since then his love of the sport has led him around the world s countries coasts and rivers from the wilds of Alaska to Basque country from Ireland and Norway to Russia and Japan And in true Kurlansky fashion he absorbed every fact detail and anecdote along the way The Unreasonable Virtue of Fly Fishing marries Kurlansky s signature wide ranging reach with a subject that has captivated him for a lifetime combining history craft and personal memoir to show readers devotees of the sport or not the necessity of experiencing nature s balm first hand

Making Mountains David Stradling, 2009-11-23 For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City In Making Mountains David Stradling shows the transformation of the Catskills landscape as a collaborative process one in which local and urban hands capital and ideas have come together to reshape the mountains and the communities therein This collaboration has had environmental economic and cultural consequences Early on the Catskills were an important source of natural resources Later when New York City needed to expand its water supply engineers helped direct the city toward the Catskills claiming that the mountains offered the purest and most cost effective waters By the 1960s New York had created the great reservoir

and aqueduct system in the mountains that now supplies the city with 90 percent of its water The Catskills also served as a critical space in which the nation's ideas about nature evolved Stradling describes the great influence writers and artists had upon urban residents especially the painters of the Hudson River School whose ideal landscapes created expectations about how rural America should appear By the mid 1800s urban residents had turned the Catskills into an important vacation ground and by the late 1800s the Catskills had become one of the premiere resort regions in the nation In the mid twentieth century the older Catskill resort region was in steep decline but the Jewish Borscht Belt in the southern Catskills was thriving The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape Throughout each of these significant incarnations urban and rural residents worked in a rough collaboration though not without conflict to reshape the mountains and American ideas about rural landscapes and nature
