## **Complex Predicates:**

**Complex Predicates** Ad Neeleman,1994      *Complex Predicates* Mengistu Amberber,Brett Baker,Mark Harvey,2010-04-22 Complex predicates are multipredicational but monoclausal structures They have proven problematic for linguistic theory particularly for proposed distinctions between the lexicon morphology and syntax This volume focuses on the mapping from morphosyntactic structures to event structure and in particular the constraints on possible mappings The volume showcases the coverb construction a complex predicate construction which though widespread has received little attention in the literature The coverb construction contrasts with more familiar serial verb constructions The coverb construction generally maps only to event structures like those of monomorphemic verbs whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs The volume coverage is truly cross linguistic including languages from Australia Papua New Guinea Southeast Asia the Indian subcontinent East Africa and North America The volume establishes a new arena of research in event structure syntax and cross linguistic typology

**Complex Predicates** Alex Alsina,Joan Bresnan,Peter Sells,1997-04-28 Complex predicates can be defined as predicates which are composed of more than one grammatical element either morphemes or words each of which contributes a non trivial part of the information of the complex predicate The papers collected in this volume which were presented at a workshop at Stanford in 1993 represent a variety of approaches to the question of the range and nature of complex predicates and draw on data from a wide spectrum of languages This collection develops a better understanding of the range of phenomena that a general theory of complex predicates would have to account for and to see what kinds of linguistic ideas and methodologies would be necessary for such a task      Approaches to Complex Predicates Léa Nash,Pollet

Samvelian,2016-04-26 Complex predicates can be loosely defined as a sequence of items that behave as a single predicate projecting a single argument structure within a clause Each of the members of the predicate contributes part of the information ordinarily associated with a single head The present volume presents a collection of theoretical linguistic results on the study of complex predicates in different perspectives and with a variety of approaches Important empirical and theoretical issues cutting across various subfields of linguistics are being addressed in this book such as Syntactic and semantic modeling of complex predicate formation compositionality argument structure event structure Differences between syntactic and morphological processes of lexeme formation Typological and diachronic issues in complex predicate formation Neo Davidsonian analyses of abstract predicate decomposition and its morphological correlates Contributors are Ane Berro Denis Creissels Hannah Gibson Adele Goldberg Lutz Marten Annie Montaut L a Nash Pooja Paul Pollet Samvelian Peter Svenonius and Susanne Wurmbrand      *The Structure of Complex Predicates in Urdu* Miriam Butt,1995-07 This book takes a detailed look at two differing complex predicates in the South Asian language Urdu The Urdu permissive in particular brings into focus the problem of the syntax semantics mismatch An examination of the syntactic properties of this complex predicate

shows that it is formed by the combination of two semantic heads but that this combination is not mirrored in the syntax in terms of any kind of syntactic or lexical incorporation

**Complex Predicates in Nonderivational Syntax** Erhard Hinrichs, Andreas Kathol, Tsuneko Nakazawa, 2020-06-15 Complex Predicates in Nonderivational Syntax collects recent research in complex predicates within a variety of languages such as German Dutch Italian French Korean and Urdu Recognizing that complex predicates is one of the most active research areas in nonderivational theories of grammar contributors focus on diverse aspects of complex predicate phenomena including order variation constituency relations interactions with other construction types argument relations and the syntax morphology interface Their concentration on issues of linguistically adequate description open these articles to those interested in syntax semantics morphology computational linguistics and natural language processing It includes essays written by the leading researchers in the field including Ivan Sag It makes the clearest and most advanced statement to date about complex predicates

Complex Predicates in Oceanic Languages Isabelle Bril, Françoise Ozanne-Rivierre, 2012-04-17 Serial verbs and complex predicates have a long history of research yet there is comparatively little documentation on Oceanic languages This volume presents new data for further typological studies While previous research on serial verbs in Oceanic languages was mostly devoted to core serial constructions with non contiguous sV o sV o nuclei this volume contributes a more detailed investigation of the nuclear type of complex predicates involving contiguous sVV o nuclei Complex predicates of the form VV may correspond to two different syntactic structures either co ranking or hierarchized head modifier Though the VV pattern does evidence a tendency towards structural compression often entailing the fusion of the argument structures of two or more nuclei yet it cannot be reduced to cases of co lexicalization compounding or grammaticalization The data also show the nuclear type to be compatible with all types of basic word orders VSO VOS SVO SOV with no evidence that this results from any word order change This challenges the claim that nuclear serialization correlates with verb final order and core serialization with verb medial order

**Argument Realisation in Complex Predicates and Complex Events** Brian Nolan, Elke Diedrichsen, 2017-01-26 This book offers a comprehensive investigative study of argument realisation in complex predicates and complex events at the syntax semantic interface across a wide variety of the world s languages ranging over languages such as German Irish Sicilian and Italian Lithuanian Estonian and other Finno Ugric languages Pitjantjatjara Yankunytjatjara and Ngaanyatjarra from Australia s Western Desert region Japanese Tepehua Totonacan Mexico Cheyenne Mexican Spanish Boharic Coptic and Persian This volume examines the syntactic variation of complex events complex predicates and multi verb constructions within a single clause where the clause is view as representing a single event studying their semantics and syntax within functional cognitive and constructional frameworks to arrive at a better understanding of their cross linguistic behaviour and how they resonate in syntax These constructions manifest considerable variability in cross linguistic comparisons of complex predicate formation In European languages for example typically one of the verbs in a verb verb

construction highlights a phase of an underspecified event while the matrix verb specifies the actual event In contrast serial verbs require each verb to provide a sub event dimension within a complex event that is viewed holistically as unitary in syntax This book contributes to an understanding of complex events complex predicates and multi verb constructions across languages their syntactic constructional patterns and argument realisation     *The Structure of Complex Predicates in Urdu* Miriam Jessica Butt,1993     [Composite Predicates in English](#) Ray Cattell,2020-01-13 Preliminary Material Ray Cattell Light Verbs in English Ray Cattell Insight from the Past Ray Cattell Complex Predicates Ray Cattell Have and Composite Predicates Ray Cattell The Relations Between Have and Be Ray Cattell Get and Give Ray Cattell Causative Give Ray Cattell Non Causative Give Ray Cattell Make Ray Cattell Conclusion Ray Cattell References Ray Cattell Index Ray Cattell Contents of Previous Volumes Ray Cattell
