Computer Architecture Gérard Blanchet, Bertrand Dupouy, 2013-01-24 This book lays out the concepts necessary to understand how a computer works For reasons of clarity the authors have deliberately chosen examples that apply to machines from all eras without having to water

down the contents of the book This choice helps to show how techniques concepts and performances have evolved since the first computers The book is divided into five parts The first four which are of increasing difficulty are the core of the book Elements of a Basic Architecture Programming Model and Operation Memory Hierarchy Parallelism and Performance Enhancement The final part provides hints and solutions to the exercises in the book as well as appendices The reader may approach each part independently based on their prior knowledge and goals *Readings in Computer Architecture* Mark D. Hill, Gurindar S. Sohi, 2000 Offering a carefully reviewed selection of over 50 papers illustrating the breadth and depth of computer architecture this text includes insightful introductions to guide readers through the primary sources

Optimizing HPC Applications with Intel Cluster Tools Alexander Supalov, Andrey Semin, Christopher Dahnken, Michael Klemm, 2014-10-09 Optimizing HPC Applications with Intel Cluster Tools takes the reader on a tour of the fast growing area of high performance computing and the optimization of hybrid programs These programs typically combine distributed memory and shared memory programming models and use the Message Passing Interface MPI and OpenMP for multi threading to achieve the ultimate goal of high performance at low power consumption on enterprise class workstations and compute clusters The book focuses on optimization for clusters consisting of the Intel Xeon processor but the optimization methodologies also apply to the Intel Xeon Phi coprocessor and heterogeneous clusters mixing both architectures Besides the tutorial and reference content the authors address and refute many myths and misconceptions surrounding the topic The text is augmented and enriched by descriptions of real life situations Mobile and Handheld Computing Solutions for Organizations and End-Users Hu, Wen-Chen, 2013-01-31 Mobile and Handheld Computing Solutions for Organizations and End Users discusses a broad range of topics in order to advance handheld knowledge and apply the proposed methods to real world issues for organizations and end users This book brings together researchers and practitioners involved with mobile and handheld computing solutions useful for IT students researchers and scholars **Computer Architecture** John L. Hennessy, David A. Patterson, 2002-05-29 This best selling title considered for over a decade to be essential reading for every serious student and practitioner of computer design has been updated throughout to address the most important trends facing computer designers today In this edition the authors bring their trademark method of quantitative analysis not only to high performance desktop machine design but also to the design of embedded and server systems They have illustrated their principles with designs from all three of these domains including examples from consumer electronics multimedia and web technologies and high performance computing The book retains its highly rated features Fallacies and Pitfalls which share the hard won lessons of real designers Historical Perspectives which provide a deeper look at computer design history Putting it all Together which present a design example that illustrates the principles of the chapter Worked Examples which challenge the reader to apply the concepts theories and methods in smaller scale problems and Cross Cutting Issues which show how the ideas covered in one chapter interact with those presented in others In addition a new feature Another View

presents brief design examples in one of the three domains other than the one chosen for Putting It All Together The authors present a new organization of the material as well reducing the overlap with their other text Computer Organization and Design A Hardware Software Approach 2 e and offering more in depth treatment of advanced topics in multithreading instruction level parallelism VLIW architectures memory hierarchies storage devices and network technologies Also new to this edition is the adoption of the MIPS 64 as the instruction set architecture In addition to several online appendixes two new appendixes will be printed in the book one contains a complete review of the basic concepts of pipelining the other provides solutions a selection of the exercises Both will be invaluable to the student or professional learning on her own or in the classroom Hennessy and Patterson continue to focus on fundamental techniques for designing real machines and for maximizing their cost performance Presents state of the art design examples including IA 64 architecture and its first implementation the Itanium Pipeline designs for Pentium III and Pentium IV The cluster that runs the Google search engine EMC storage systems and their performance Sony Playstation 2 Infiniband a new storage area and system area network SunFire 6800 multiprocessor server and its processor the UltraSPARC III Trimedia TM32 media processor and the Transmeta Crusoe processor Examines quantitative performance analysis in the commercial server market and the embedded market as well as the traditional desktop market Updates all the examples and figures with the most recent benchmarks such as SPEC 2000 Expands coverage of instruction sets to include descriptions of digital signal processors media processors and multimedia extensions to desktop processors Analyzes capacity cost and performance of disks over two decades Surveys the role of clusters in scientific computing and commercial computing Presents a survey taxonomy and the benchmarks of errors and failures in computer systems Presents detailed descriptions of the design of storage systems and of clusters Surveys memory hierarchies in modern microprocessors and the key parameters of modern disks Presents a glossary of networking terms
