Alexander Soifer,2008-10-13 This is a unique type of book at least I have never encountered a book of this kind The best description of it I can give is that it is a mystery novel developing on three levels and imbued with both educational and philosophical moral issues If this summary description does not help understanding the particular character and allure of the book possibly a more detailed explanation will be found useful One of the primary goals of the author is to interest readers in particular young mathematicians or possibly pre mathematicians in the fascinating world of elegant and easily understandable problems for which no particular mathematical knowledge is necessary but which are very far from being easily solved In fact

the prototype of such problems is the following If each point of the plane is to be given a color how many colors do we need if every two points at unit distance are to receive distinct colors More than half a century ago it was established that the least number of colors needed for such a coloring is either 4 or 5 or 6 or 7 Well which is it Despite efforts by a legion of very bright people many of whom developed whole branches of mathematics and solved problems that seemed much harder not a single advance towards the answer has been made This mystery and scores of other similarly simple questions form one level of mysteries explored In doing this the author presents a whole lot of attractive results in an engaging way and with increasing level of depth

Coloring Book 71 Dayat Suryana, 2024-08-03 Coloring books for kids is an activity that is educational and fun at the same time These books usually have large pictures and clear contours specifically designed to make coloring easier for children The designs often vary from cute cartoon characters cute animals to charming natural landscapes Bright and varied colors dominate the pages awakening children's creativity and imagination The coloring process can help them develop fine motor skills improve focus and teach them about color selection and coordination Apart from that coloring can also be a relaxing activity for children helping them deal with stress or anxiety in a fun way Coloring books often also contain educational elements such as numbers letters or other concepts embedded in the images By coloring these books children can not only express themselves but also learn while playing making it an ideal combination for their all round development
