Complexity And Contradiction In Architecture 2nd Second Edition Text Only:

The Familiar and the Unfamiliar in Twentieth-century Architecture Jean La Marche, 2003 Matching the texts the architects wrote with the buildings they were designing contemporaneously he focuses on the language employed in discussing the subject to reveal the author architects distinct voices and points of view **BOOK JACKET**

Digital Draw Connections Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at re projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension As such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of representation Composed of 43 chapters written by 81 authors from around the world with an introduction by Jim Venturi and Cezar Nicolescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research

Las Vegas in the Rearview Mirror Martino Stierli, 2013 An illustrated reevaluation of the seminal architectural manifesto Learning from Las Vegas It explores the significance of this controversial publication by situating it in the artistic architectural and urbanist discourse of the 1960s and 70s and by evaluating the book s enduring influence of visual studies and architectural research

Teaching Architecture Inès Lamunière, Laurent Stalder, 2019-01-14 What are the pressing questions in architecture in teaching research and practice Based on their many years of experience professors In s Lamuni re and Laurent Stalder come together in five meetings to search for answers They describe an approach to architecture that is based on intellect as well as intuition and is both strict and pragmatic And they sketch out creative processes that are indispensable in the development of projects with all their constraints in order to master the future challenges faced by the art of building

Complexity and Contradiction in Architecture Robert Venturi, 1977-01-01 Complexity and Contradiction in Architecture is the first in a series of occasional papers concerned with the theoretical background of modern architecture Unlike other Museum publications in architecture and design the series will be independent of the Museum s exhibition program and will explore ideas too complex for presentation in exhibition form and authors will represent no single professional group According to the author this book is both an attempt at architectural criticism and an apologia an explanation indirectly of his work The examples chosen reflect his partiality for certain eras Mannerist Baroque and Rococo especially Separate chapters cover concepts such as nonstraightforward architecture complexity and contradiction vs simplification or picturesqueness contradictory levels of meaning and use in architecture and the double functioning element Also discussed are the complexity and contradiction that develops from the program of the building and reflects the inherent complexities and contradictions of living The final chapter presents
