Continuing Professional Development Andrew L. Friedman, 2013-03-01 Continuing Professional Development CPD is the means by which the professions across the world ensure that their knowledge and skills remain up to date and relevant to changing needs and environments CPD significantly contributes to the quality and reputation of the professions and therefore to the quality of national and international social life and economic well being Starting with a discussion on what CPD is the author analyzes how professional bodies govern CPD what support they provide to individual professionals and how they measure or evaluate what individuals do under the provenance of CPD Continuing Professional Development explains why up to now CPD has been a relatively neglected subject in spite of it being carried out by millions It argues whether a variety of perspectives or visions of CPD has held back wider public appreciation of it and if greater co ordination by professional bodies or the introduction of new players to the field will change this in the future Providing the first comprehensive study of the subject this innovative book will be required reading for CPD professionals and researchers and is a fascinating read for all professionals especially those involved with human resource development and management leadership development

Paradox And The Family System Camillo Lorio, Gaspare Vella, 2013-10-28 Provides therapists with an understanding of the principles applications and implications of paradoxical therapy the rationale for the use of paradox in family therapy and the therapist's role in paradoxical interventions

Elgar Introduction to Organizational Paradox Theory Berti, Marco, Simpson, Ace, Cunha, Miguel P., Clegg, Stewart R., 2021-07-31 This insightful Elgar Introduction comprises the first effort to provide a succinct overview of the field of organizational paradox theory exploring contradictions and tensions in organizational settings By conceptually mapping the field it offers guidance through the literature on paradox making space for new interpretations and applications of the concept

Paradox and the School Leader Chris Dolan, 2020-03-24 This book proposes that paradox as a theoretically rich and historically enduring concept has significant potential for researchers in the field of critical leadership studies By enriching its general form and infusing it with added complexity and theoretical influence it is argued that paradox can be legitimately applied as a lens for examining and as a pedagogy for realising new learning possibilities The book takes paradoxes as formed out of the constitutive practices of discourse rather than as representations of conflict or complexity Using fifteen paradoxes derived from theoretical and empirical analysis it provides insights into the competing forces that contradict simplistic positivist accounts of contemporary school leadership and reveal the presence of a political struggle for the soul of the principal in the neoliberal era It considers these paradoxes in three categories 1 principal subjectivity and authority 2 neoliberal policy and 3 managerial practice The book advocates critique counter conduct and agonistic thought and practice as resources for principals participating in such a struggle and employs Foucault's care of the self and practices of freedom to promote more

active involvement of principals in authoring their ethical and political selves *Empirical Paradox, Complexity Thinking and Generating New Kinds of Knowledge* Paolo Grigolini, Korosh Mahmoodi, Bruce J. West, 2019-06-05 Is another world war inevitable The answer is a resounding yes if we continue to think in terms of either or outcomes Adversaries think in such terms you either get what you want or you do not Can a different way of thinking produce a different outcome This book shows that the consistency demanded by the linear logical either or thinking is disrupted by paradox whose resolution forces a consequent decision war or peace with no middle ground If this were the only way of thinking then a person would be either a protagonist or an antagonist but a person can be both either or neither this opens the door to novel solutions This is both and thinking which the book shows can be achieved by a dynamic resolution of paradox Thus a basically selfish individual can also be a hero a consequence of the complexity of being human *Postformal Education* Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past Gidley's challenge is to co evolve a radically new education All who seek to play a part must read this book Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA
