This book covers dermatological and related esthetic concerns specific to female patients. Since knowing what's normal is as important as knowing what's not, the first chapters cover physiological differences in the skin of women and the changes during puberty, pregnancy, and menopause. Certain commonly encountered dermatoses are more frequent in females: chronic telogen effluvium, rosacea, perioral dermatitis, pigmented contact dermatitis, etc., which are explained in a more focused manner. Dermatoses exclusive to females involving the vulva are discussed at length. These include common papulosquamous conditions such as psoriasis, lichen planus, and lichen sclerosus, as well as the uncommon but challenging plasma cell vulvitis. Breast dermatoses also are predominantly encountered in women and are described in detail in this book. Importantly, the safety of drugs and biologics in pregnancy and lactation have been covered too. One section is dedicated to the emotional and psychological burden of skin disease in women and certain disorders requiring psychiatric intervention, such as obsessive compulsive disorder, trichotillomania, trichotemnomania, and body dysmorphic disorder. Furthermore, commonly used cosmeceuticals and frequently performed esthetic procedures, such as chemical peels, botulinum toxin, and soft tissue augmentation fillers, are well explained. Skin diseases in females can cause a significant emotional and psychological impact that can sometimes be more serious than the physical impact. There is a paucity of comprehensive published literature in both journals and books, and this book aims to fill that gap. This book is meant as a resource for dermatology residents and trainees, practitioners, and teachers.

Severe Skin Diseases in Children Wynn L. Tom, 2013-12-02. A textbook to guide practitioners on treating severe skin diseases in children when they have failed topical therapy will discuss the appropriate candidates, considerations, and approaches in drug therapy, possible problems that may arise. Photographs will help to illustrate the cases/conditions.
