Quality and Reliability of Large-Eddy Simulations Johan Meyers, Bernard Geurts, Pierre Sagaut, 2008-06-26 Computational resources have developed to the level that for the first time it is becoming possible to apply large eddy simulation LES to turbulent flow problems of realistic complexity Many examples can be found in technology and in a variety of natural flows This puts issues related to assessing assuring and predicting the quality of LES into the spotlight Several LES studies have been published in the past demonstrating a high level of accuracy with which turbulent flow predictions can be attained without having to resort to the excessive requirements on computational resources imposed by direct numerical simulations However the setup and use of turbulent flow simulations requires a profound knowledge of fluid mechanics numerical techniques and the application under consideration The susceptibility of large eddy simulations to errors in modelling in numerics and in the treatment of boundary conditions can be quite large due to nonlinear accumulation of different contributions over time leading to an intricate and unpredictable situation A full understanding of the interacting error dynamics in large eddy simulations is still lacking To ensure the reliability of large eddy simulations for a wide range of industrial users the development of clear standards for the evaluation prediction and control of simulation errors in LES is summoned The workshop on Quality and Reliability of Large Eddy Simulations held October 22-24 2007 in Leuven Belgium QLES2007 provided one of the first platforms specifically addressing these aspects of LES

High-Performance Scientific Computing Edoardo Di Napoli, Marc-André Hermanns, Hristo Iliev, Andreas Lintermann, Alexander Peyser, 2017-03-01 This book constitutes the thoroughly refereed post conference proceedings of the First JARA High Performance Computing Symposium JARA HPC 2016 held in Aachen Germany in October 2016 The 21 full papers presented were carefully reviewed and selected from 26 submissions They cover many diverse topics such as coupling methods and strategies in Computational Fluid Dynamics CFD performance portability and applications in HPC as well as provenance tracking for large scale simulations

Quality and Reliability of Large-Eddy Simulations II Maria Vittoria Salvetti, Bernard Geurts, Johan Meyers, Pierre Sagaut, 2010-11-03 The second Workshop on Quality and Reliability of Large Eddy Simulations QLES2009 was held at the University of Pisa from September 9 to September 11 2009 Its predecessor QLES2007 was organized in 2007 in Leuven Belgium The focus of QLES2009 was on issues related to predicting assessing and assuring the quality of LES The main goal of QLES2009 was to enhance the knowledge on error sources and on their interaction in LES and to devise criteria for the prediction and optimization of simulation quality by bringing together mathematicians physicists and engineers and providing a platform specifically addressing these aspects for LES Contributions were made by leading experts in the field The present book contains the written contributions to QLES2009 and is divided into three parts which reflect the main topics addressed at the workshop i SGS modeling and discretization errors ii Assessment and reduction of computational errors iii Mathematical analysis and
