Unifying Systems Aarne Mämmelä, 2025-04-29 Interdisciplinary systems thinking is complementary but does not replace conventional disciplinary analytical thinking The book is valuable for researchers their advisors and other thinkers interested in deep knowledge of science Interdisciplinary systems thinking is valuable for three reasons The goal of all science is a unified view of the world we cannot solve the significant problems of our time without interdisciplinary collaboration and general theories of systems and system archetypes support the solution to those problems System archetypes are generic system models that have stood the test of time As specialists within a discipline we must be able to communicate between disciplines Interdisciplinary generalists can offer us reliable visions and relevant research problems The goal of interdisciplinary research is to find unified solutions to those problems The book provides a lot of information from over a thousand sources in a structured manner to help the reader The book includes a comprehensive chronology vocabulary and bibliography The author has been a research professor in information engineering for over 25 years During his career he became interested in systems thinking which is closely related to the philosophy and history of science

Computational Intelligence Leszek Rutkowski, 2008-05-29 This quite simply superb book focuses on various techniques of computational intelligence both single ones and those which form hybrid methods These techniques are today commonly applied to issues of artificial intelligence The book presents methods of knowledge representation using different techniques namely the rough sets type 1 fuzzy sets and type 2 fuzzy sets Next up various neural network architectures are presented and their learning algorithms are derived Then the family of evolutionary algorithms is discussed including connections between these techniques and neural networks and fuzzy systems Finally various methods of data partitioning and algorithms of automatic data clustering are given and new neuro fuzzy architectures are studied and compared
