This umbrella term encompasses a wide spectrum of treatment modalities. Therapies can be used individually or in combination as part of a multimodal approach and applied easily to every patient or used in select cases. Sample topics covered in *Integrative Medicine in Veterinary Practice* include

Starve Cancer - Feed Your Dog! Jo Cowden PhD, Connie McMillan DVM, 2021-06-01 In this important book the authors present a nutritional regimen that helps dogs diagnosed with cancer maintain their body weight while at the same time denying the cancer what it needs to grow Perhaps the scariest impact of cancer is seeing your dog s lean body mass waste away causing them to rapidly lose strength The recommendations in this book are not going to cure them but it improves their quality of life and extends life expectancy From the Foreword by Sarah Lyles DVM DACVIM Oncology Nutrition is a sensitive and sometimes controversial subject in veterinary medicine As an oncologist I want to make recommendations based on published data and science of which there is little in the field of nutrition for veterinary oncology There are so many ways to feed the body to maintain health decrease inflammation and naturally promote healing for several conditions For some chronic diseases such as chronic kidney disease

nutrition is the main source of therapy Unfortunately for cancer there is less data Cancer is also diverse with highly variable outcomes depending on cancer type and treatment modality chosen With few publications showing proven benefits I often feel I cannot make strong recommendations about dietary therapy for my cancer patients It would be nice if more were known However Drs Cowden and McMillan have compiled a comprehensive book of what is known They have reviewed books and peer reviewed articles on cancer nutrition in pets to create a how to guide and provide information all in one place They did this for you having been in your shoes No more scouring the internet uncertain if the recommendations are trustworthy and feeling overwhelmed by conflicting opinions Think of this book as a resource providing you with everything you need to know about complete nutrition for your dog with cancer [Placebos for Pets?](#) Brennen McKenzie, 2022-06-29 Whether online or in the local pet store there are a bewildering variety of pet healthcare products and services to choose from Diets and supplements ancient herbs and folk remedies and even high tech treatments like hyperbaric oxygen tanks and laser therapy Everything promises to give your pet better health and a longer life and isn't that what every pet owner wants But how do you know if all of these products do what they claim Are they safe If they really are miraculous cures why are so many offered only on the Internet or by a few veterinarians specializing in alternative medicine Brennen McKenzie a vet with twenty years of experience and the former president of the Evidence based Veterinary Medicine Association helps pet owners and veterinary professionals understand the claims and the evidence allowing them to make better choices for their companions and patients
