Value with BIM Adriana Sanchez, Keith Hampson, Simon Vaux, 2016-03-31 Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world. Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset. This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory. It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure. Additionally, the book features wide-ranging information about BIM, the challenges of monitoring progress towards benefit goals and the greater context of implementation; a set of dictionaries that illustrate how benefits can be achieved; what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them; a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM; real-world examples from across the world and life cycle phases that show how these benefits can be achieved; and information on international maturity and competency measures to complement the value realisation framework. Including a blend of academic and industry input, this book has been developed in close collaborative consultation with industry, government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM-related courses.

Arbitrating under the 2020 LCIA Rules Maxi Scherer, Lisa Richman, Rémy Gerbay, 2021-07-12 The London Court of International Arbitration (LCIA), the oldest of all major arbitral institutions, has since its establishment well over a century ago embodied the ideals that underlie the arbitral alternative and set its face against undue delay, soaring cost, complexity and acrimony. Today the LCIA administers cases arising under any system of law in any venue worldwide. Underscoring the institution's international nature, and over 80% of parties in pending LCIA cases today are not of English nationality. This highly practical and user-friendly guide provides not only a thorough analysis of the 2020 LCIA Rules but also a comprehensive explanation of the basic principles governing LCIA arbitration along with an in-depth analysis of complex issues that may arise in the course of LCIA proceedings. Among the new and revised rules affecting LCIA practice and procedure described in detail include the following: use of technology; accommodating virtual conferencing; remote hearings; and electronically signed awards, as well as confirming the primacy of electronic communication with the LCIA tools to expedite proceedings, including the possibility of early dismissal determinations; explicit consideration of data protection issues relating to bribery, corruption, terrorist financing, fraud, tax evasion, money laundering and/or economic or trade sanctions; streamlined accommodations for consolidation, composite Requests and concurrent conduct of arbitrations; conduct of authorised representatives of a party; requirements for appointment and removal of tribunal secretaries; and revised schedules of arbitration and mediation costs. The twenty-six chapters of the book provide references to essential national court judgments, statutory provisions up to date statistics and bibliographical sources on LCIA arbitrations. The 2020 LCIA Rules reflect the most sophisticated current

modifications of arbitral procedure fully aligned with the needs of current global commercial activities For this reason and because many companies worldwide include LCIA arbitration clauses in their agreements this book is invaluable to business executives and corporate counsel as well as to scholars of alternative dispute resolution **Advances in 3D**
