Energy Systems Engineering: Evaluation and Implementation, Second Edition Francis Vanek, Louis Albright, Largus Angenent, 2012-04-04 Fully updated to cover the latest energy systems and technologies this new edition offers a balanced analytical approach to assessing options and making decisions about energy systems while emphasizing a portfolio approach in which a range of energy options are employed rather than one technology Provided by publisher

Assessment of Fuel Economy Technologies for Light-Duty Vehicles National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on the Assessment of Technologies for Improving Light-Duty Vehicle Fuel Economy, 2011-07-03 Various combinations of commercially available

technologies could greatly reduce fuel consumption in passenger cars sport utility vehicles minivans and other light duty vehicles without compromising vehicle performance or safety Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines spark ignition gasoline compression ignition diesel and hybrid According to its estimates adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark ignition engines could reduce fuel consumption by 29 percent at an additional cost of 2 200 to the consumer Replacing spark ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately 5 900 per vehicle and replacing spark ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of 6 000 per vehicle The book focuses on fuel consumption the amount of fuel consumed in a given driving distance because energy savings are directly related to the amount of fuel used In contrast fuel economy measures how far a vehicle will travel with a gallon of fuel Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information

User-Centric Technology Design for Nonprofit and Civic Engagements Saqib Saeed, 2014-04-26 Due to the increased global political importance of the nonprofit sector its technological support and organizational characteristics have become important fields of research In order to conduct effective work nonprofits need to communicate and coordinate effectively However such settings are generally characterized by a lack of resources an absence of formal hierarchical structures and differences in languages and culture among the activists Modern technologies could help nonprofit networks in improving their working In order to design appropriate technological support for such settings it is important to understand their work practices which widely differ from traditional business organizations This book aims to strengthen the body of knowledge by providing user studies and concepts related to user centered technology design process for nonprofit settings The examination of ethnographic studies and user centered evaluation of IT artifacts in practice will further the understanding of design requirements of these systems This book includes chapters from leading scholars and practitioners on the technology design process examining human centered factors The chapters will focus on developed and developing countries as they both have unique issues in technology design The book will be useful or of interest to academics from a range of fields including information systems human computer interaction computer supported cooperative work and organizational science as well as for government officials and governmental organizations Autocar & Motor ,1992-11-04
