Chapter 1: The Nature of Life

Question 1 (a) What is life?

Answer:

Life is the state of being alive. It is the condition of an organism that enables it to grow, reproduce, respond to its environment, and maintain its internal balance.

Answer:

1. Life is a complex phenomenon that involves many different processes. It is the state of being alive, which allows an organism to grow, reproduce, respond to its environment, and maintain its internal balance.
2. Living organisms are made up of cells. Cells are the basic units of life. They contain genetic material (DNA) which controls the growth and development of the organism. Cells also carry out metabolic processes, such as photosynthesis and respiration, which provide the energy needed for life.
3. Living organisms are able to respond to changes in their environment. This is called the ability to respond to stimuli. For example, a plant will grow towards light, and a dog will bark when it hears a bell.
4. Living organisms are able to reproduce. This means they can produce new individuals of their own kind. Reproduction is essential for the survival of a species.
5. Living organisms are able to maintain a constant internal environment. This is called homeostasis. For example, a human body will maintain a constant temperature of 37°C.
6. Living organisms are able to grow and develop. This means they increase in size and complexity over time. Growth and development are controlled by genetic material and hormones.
7. Living organisms are able to interact with their environment. This means they can take in nutrients and oxygen, and release waste products. They also interact with other organisms in their environment.

Question 1 (b) Name the following life processes:

Answer:

1. Growth: the increase in size of an organism.

Answer:

2. Reproduction: the production of new individuals of the same species.

Answer:

3. Response: the ability of an organism to react to changes in its environment. For example, a plant will grow towards light, and a dog will bark when it hears a bell.

Answer:

4. Homeostasis: the ability of an organism to maintain a constant internal environment.
