Differential Evolution In Search Of Solutions Springer Optimization And Its Applications:

Differential Evolution Vitaliy Feoktistov, 2007-02-15 Differential evolution is one of the most recent global optimizers. Discovered in 1995 it rapidly proved its practical efficiency. This book gives you a chance to learn all about differential evolution. On reading it you will be able to profitably apply this reliable method to problems in your field. As for me, my passion for intelligent systems and optimization began as far back as during my studies at Moscow State Technical University of Bauman, the best engineering school in Russia. At that time I was gathering material for my future thesis. Being interested in my work, the Mining School of Paris proposed that I write a dissertation in France. I hesitated some time over a choice, but my natural curiosity and taste for novelty finally prevailed. At present, Docteur es science en informatique de l'Ecole des Mines de Paris, I am concentrating on the development of my own enterprise. If optimization is my vocation, my hobbies are mathematics and music. Although mathematics disciplines the mind, music is filled with emotions. While playing my favorite composition, I decided to write this book. The purpose of the book is to give in a condensed but overview form a description of differential evolution. In addition, this book makes accessible to a wide audience the fruits of my long research in optimization. Namely, I laid the foundation of the universal concept of search strategies design suitable not only for differential evolution but for many other algorithms. Also, I introduced a principle of energetic selection, an efficient method of hybridization, and advanced parallelizing techniques.

Theory and Practice of Natural Computing Adrian-Horia Dediu, Manuel Lozano, Carlos Martín-Vide, 2014-12-05 This book constitutes the refereed proceedings of the Third International Conference TPNC 2014 held in Granada, Spain, in December 2014. The 22 revised full papers presented in this book were carefully reviewed and selected from 47 submissions. The papers are organized in topical sections on nature-inspired models of computation, synthesizing nature by means of computation, nature-inspired materials and information processing in nature.

Swarm and Evolutionary computation Leszek Rutkowski, Marcin Korytkowski, Rafał Scherer, Ryszard Tadeusiewicz, Lotfi Zadeh, Jacek Zurada, 2012-04-15 The volume LNCS 7269 constitutes the refereed proceedings of the International Symposium on Swarm Intelligence and Differential Evolution SIDE 2012 held in Zakopane, Poland, in April-May 2012 in conjunction with the 11th International Conference on Artificial Intelligence and Soft Computing ICAISC 2012. The proceedings are published as two volume sets, LNCS 7267 and 7268. The 212 revised full papers presented were carefully reviewed and selected from 483 submissions. The volume is divided into two topical parts: proceedings of the 2012 symposium on swarm intelligence and differential evolution, and on evolutionary algorithms and their applications.

Applications of Evolutionary Computation Cecilia Di Chio, Stefano Cagnoni, Carlos Cotta, Marc Ebner, Aniko Ekart, Anna I. Esparcia-Alcázar, Chi-Keong Goh, Juan J. Merelo, Ferrante Neri, Mike Preuss, Julian Togelius, Georgios N. Yannakakis, 2010-04-03 Evolutionary Computation (EC) techniques are efficient, nature-inspired methods based on the principles of natural evolution and genetics. Due to their efficiency and simple underlying principles, these methods can be used for a

diverse range of activities including problemsolving optimization machine learning and pattern recognition A large and continuously increasing number of researchers and professionals make use of EC techniques in various application domains This volume presents a careful selection of relevant EC examples combined with a thorough examination of the techniques used in EC The papers in the volume illustrate the current state of the art in the application of EC and should help and inspire researchers and professionals to develop efficient EC methods for design and problem solving All papers in this book were presented during EvoApplications 2010 which included a range of events on application oriented aspects of EC Since 1998 EvoApplications formerly known as EvoWorkshops has provided a unique opportunity for EC researchers to meet and discuss application aspects of EC and has been an important link between EC research and its application in a variety of domains During these 12 years new events have arisen some have disappeared while others have matured to become conferences of their own such as EuroGP in 2000 EvoCOP in 2004 and EvoBIO in 2007 And from this year EvoApplications has become a conference as well

Adaptation and Hybridization in Computational Intelligence Iztok Fister, Iztok Fister Jr., 2015-01-24 This carefully edited book takes a walk through recent advances in adaptation and hybridization in the Computational Intelligence CI domain It consists of ten chapters that are divided into three parts The first part illustrates background information and provides some theoretical foundation tackling the CI domain the second part deals with the adaptation in CI algorithms while the third part focuses on the hybridization in CI This book can serve as an ideal reference for researchers and students of computer science electrical and civil engineering economy and natural sciences that are confronted with solving the optimization modeling and simulation problems It covers the recent advances in CI that encompass Nature inspired algorithms like Artificial Neural networks Evolutionary Algorithms and Swarm Intelligence based algorithms

Advances in Knowledge-based and Intelligent Information and Engineering Systems Manuel Graña, 2012 In this 2012 edition of Advances in Knowledge Based and Intelligent Information and Engineering Systems the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world The 228 papers that are included cover a wide range of topics One emphasis is on Information Processing which has become a pervasive phenomenon in our civilization While the majority of Information Processing is becoming intelligent in a very broad sense major research in Semantics Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living Ontologies play a major role in the development of Knowledge Engineering in various domains from Semantic Web down to the design of specific Decision Support Systems Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here Other subjects in this volume are modern Machine Learning Lattice Computing and Mathematical Morphology The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and
