Cibse Guide A2

**Doug Oughton, Steve
Hodkinson, Richard Brailsford**

Cibse Guide A2:

Air Conditioning Engineering W Peter Jones, 2007-08-31 Designed for students and professional engineers the fifth edition of this classic text deals with fundamental science and design principles of air conditioning engineering systems W P Jones is an acknowledged expert in the field and he uses his experience as a lecturer to present the material in a logical and accessible manner always introducing new techniques with the use of worked examples

Energy: Management, Supply and Conservation Clive Beggs, 2012-06-25 With more and more concern being expressed over the Earth's dwindling energy resources as well as rising pollution levels the subject of energy management and conservation is becoming increasingly important Over half of all energy consumed is used in buildings so effective management of buildings whether commercial or domestic is vital This book is a comprehensive text dealing with the theory and practice of the supply of energy to consumers energy management and auditing and energy saving technology It will be a core text on courses on energy management and building services as well as updating professionals in the building sector

Air Conditioning Application and Design W.P. Jones, 2012-11-12 Intended for advanced students of building services this practical book describes the design of air conditioning systems Readers are assumed to have a knowledge of the basic principles of air conditioning which are covered in the companion volume *Air Conditioning Engineering* This new edition takes account of the latest building codes and pays greater attention to energy conservation The section on systems characteristics is expanded and extensively revised to take account of developments in the technology of air conditioning since publication of the previous edition There are expanded sections on specialist applications such as systems for clean rooms in the semiconductor industry The author has wide experience both in lecturing on the subject and in the practical design and installation of air conditioning systems

Environmental Design Randall Thomas, 2006 Written and edited by a team of specialists at Max Fordham LLP one of the UK's leading environmental and building services engineering consultancies Environmental Design is the result of their extensive experience in designing environmentally friendly buildings The principles of their approach which they have taught in numerous schools of architecture and engineering are clearly presented here The book starts with some basic scientific principles and environmental issues and then moves on to site planning energy use materials and building form Natural ventilation systems high efficiency mechanical equipment and alternative energy sources are also covered State of the art buildings of exceptional quality are incorporated throughout the text and illustrate the authors belief that environmentally responsible architecture can be visually exciting They conclude with a selection of detailed case studies of award winning projects including new for this third edition Beaufort Court King's Langley and the National Trust Headquarters Swindon This book is essential reading for architects engineers planners and students of these disciplines

Faber & Kell's Heating and Air-Conditioning of Buildings Doug Oughton, Steve Hodgkinson, Richard Brailsford, 2014-11-27 For over 70 years Faber Kell's has been the definitive reference text in its field It provides an understanding of the principles of heating and air

conditioning of buildings in a concise manner illustrating practical information with simple easy to use diagrams now in full colour This new look 11th edition has been re organised for ease of use and includes fully updated chapters on sustainability and renewable energy sources as well as information on the new Building Regulations Parts F and L As well as extensive updates to regulations and codes it now includes an introduction that explains the role of the building services engineer in the construction process Its coverage of design calculations advice on using the latest technologies building management systems operation and maintenance makes this an essential reference for all building services professionals Building Energy Management Systems Geoff Levermore,2013-07-04 Energy management systems are used to monitor building temperature inside and outside buildings and control the boilers and coolers Energy efficiency is a major cost issue for commerce and industry and of growing importance on university syllabuses Fully revised and updated this text considers new developments in the control of low energy and HVAC systems and contains two new chapters Written for practising engineers essential for control engineers and energy managers in addition to being essential reading for under postgraduate courses in building services and environmental engineering Solar Radiation and Daylight Models Tariq Muneer,2007-03-30 The cost of operating a building far exceeds the cost of constructing it and yet until recently little attention was paid to the impact of solar radiation on the costs of heating cooling and ventilation And now that there has been a surge in interest in energy efficiency and solar design architects and designers need a practical guide to the modelling and application of solar energy data There are many different models and techniques available for calculating the distribution of solar radiation on and in buildings and these algorithms vary considerably in scope accuracy and complexity This book demonstrates which of these predictive tools gives the best results in different circumstances including explaining which models can be best used in different parts of the world The author has had over twenty five years of experience of dealing with solar energy data from four continents and has used that experience in this book to show the development not just of knowledge but also the growing sophistication of the models available to apply it Metric Handbook Pamela Buxton,2021-11-25 The Metric Handbook is the major handbook of planning and design data for architects and architecture students with over 100 000 copies sold to successive generations of architects and designers It remains the ideal starting point for any project and belongs in every design office The seventh edition references the latest regulations and construction standards and includes new chapters on data centres and logistics facilities alongside basic design data for all the major building types For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook is the unique reference for solving everyday planning problems Building Services Journal ,2007 Newnes Building Services Pocket Book John

Knight, W.P. Jones, 2012-05-31 Newnes Building Services Pocket Book is a unique compendium of essential data techniques and procedures best practice and underpinning knowledge This makes it an essential tool for engineers involved in the design and day to day running of mechanical services in buildings and a valuable reference for managers students and engineers in related fields This pocket reference gives the reader access to the knowledge and knowhow of the team of professional engineers who wrote the sixteen chapters that cover all aspects of mechanical building services Topic coverage includes heating systems ventilation air conditioning refrigeration fans ductwork pipework and plumbing drainage and fire protection The result is a comprehensive guide covering the selection of HVAC systems and the design process from initial drafts through to implementation The second edition builds on the success of this popular guide with references to UK and EU legislation fully updated throughout and coverage fully in line with the latest CIBSE guides
