Children's Literature in Action Sylvia M. Vardell, 2019-06-14 This practitioner oriented introduction to literature for children ages 5-12 covers the latest trends, titles and tools for choosing the best books and materials as well as for planning fun and effective programs and activities. The third edition of *Children's Literature in Action* provides an activity oriented survey of children's literature for undergraduate and graduate students seeking licensure and degrees that will lead to careers working with children in schools and public libraries. Author Sylvia M. Vardell draws on her 30 years of university teaching and extensive familiarity with the major textbooks in the area of children's literature to deliver something different: a book that focuses specifically on the perspective and needs of the librarian with emphasis on practical action and library applications. Its contents address seven major genres: picture books, traditional tales, poetry, contemporary realistic fiction, historical fiction, fantasy, and informational books. Each chapter includes practical applications for the educator who shares books with children and who develops literature based instruction. Chapters are enriched by author comments, collaborative activities, featured books, special topics, and activities including selected awards and celebrations, historical connections, recommended resources, issues for discussion, and assignment suggestions. This new edition incorporates the 2018 AASL National School Library Standards.

Notable Books, Notable Lessons Andrea S. Libresco, Jeannette Balantic, Mary Battenfeld, 2017-09-21 This book provides teachers, librarians, and education methods professors with strategies, lesson plans, and activities that enable them to use literature as a springboard to social studies thematic instruction. With the amount of time and resources allocated to teaching social studies being significantly reduced, social studies lessons need to be incorporated into other subjects. *Notable Books, Notable Lessons: Putting Social Studies Back in the K-8 Curriculum* offers the tools to teach students social studies concepts that are increasingly relevant and essential in today's diverse, globalized world. Lessons that are vital in order to prepare students to think critically and participate in our multicultural democracy. Providing information that elementary and middle school teachers and librarians, district level curriculum directors and principals, staff developers, and social studies and literacy methods professors will find extremely useful, this book uses the National Council for the Social Studies (NCSS) Children's Book Council (CBC)'s current and past lists of Notable Books at the elementary and middle school levels to offer easy-to-follow lesson plans that integrate social studies instruction with reading and language arts. The lesson plans pose compelling questions to facilitate discussion and critical thinking and suggest engaging activities that are connected to the social studies concepts. The book also includes sample student handouts for the selected pieces of literature.

Untangling the Web Aleks Krotoski, 2013-05-20 The World Wide Web is the most revolutionary innovation of our time. In the last decade, it has utterly transformed our lives. But what real effects is it having on our social world? What does it mean to be a modern family when dinner table conversations take place

over smartphones What happens to privacy when we readily share our personal lives with friends and corporations Are our Facebook updates and Twitterings inspiring revolution or are they just a symptom of our global narcissism What counts as celebrity when everyone can have a following or be a paparazzo And what happens to relationships when love sex and hate can be mediated by a computer Social psychologist Aleks Krotoski has spent a decade untangling the effects of the Web on how we work live and play In this groundbreaking book she uncovers how much humanity has and hasn't changed because of our increasingly co dependent relationship with the computer In *Untangling the Web* she tells the story of how the network became woven in our lives and what it means to be alive in the age of the Internet
