Dialogicality In Development Advances In Child Development Within Culturally Structured Environments:

Dialogicality in Development Ingrid E. Josephs, 2003-09-30 The crucial nature of developmental theory is the question of relationship between cultural and personal facets of human development Dialogue is a useful concept to specify this relationship from a process oriented perspective In its broadest sense the notion of dialogue entails the interaction between at least two entities persons meanings perspectives out of which novelty can but need not emerge Thus dialogic models are open for developmental questions These issues are examined in this the first volume in which the increasingly popular metaphor of dialogue is systematically applied to developmental issues Dialogue is a multilevel concept and can be understood 1 as a real exchange between two interacting persons 2 as the interaction between culture at large e g stories and narratives and the interacting developing person and 3 as a metaphor for developmental processes in general In the first part of this international volume the concept of dialogue is elaborated by researchers from different disciplines The focus of the second section is on dialogic models in the area of self development The third deals with the dialogical co development of person and culture

Social and Cognitive Development in the Context of Individual, Social, and Cultural Processes Janette Benson, Catherine Raeff, 2004-06 Several recent analyses have focused on how social and cultural factors shape development but less well understood are the individual constructive processes involved in this interplay This volume showcases varied theoretical and empirical approaches to how individual social and cultural factors shape development and suggests new directions for future scholarship

Comparative study of human cultural development Jaan Valsiner, 2001 *Dialogic Formations* Marie-Cécile Bertau, Miguel M. Gonçalves, Peter T. F. Raggatt, 2013-01-01 This volume understands itself as an invitation to follow a fundamental shift in perspective away from the self contained I of Western conventions and towards a relational self where development and change are contingent on otherness In the framework of Dialogical Self Theory Hermans Hermans Gieser 2012 it is precisely the forms of interaction and exchange with others and with the world that determine the course of the self's development The volume hence addresses dialogical processes in human interaction from a psychological perspective bringing together previously separate theoretical traditions about the self and about dialogue within the innovative framework of Dialogical Self Theory The book is devoted to developmental questions and so broaches one of the more difficult and challenging topics for models of a pluralist self the question of how the dynamics of multiplicity emerge and change over time This question is explored by addressing ontogenetic questions directed at the emergence of the dialogical self in early infancy as well as microgenetic questions addressed to later developmental dynamics in adulthood Additionally development and change in a range of culture specific settings and practices is also examined including the practices of mothering of migration and cross cultural assimilation and of doing psychotherapy

Otherness in Question Livia Mathias Simão, Jaan Valsiner, 2007-01-01 This book brings to social scientists a new look at how human beings are striving towards understanding others and through that effort making sense of themselves It brings together researchers

from all over the World who have suggested a set of new approaches to the basic research issue of how human beings are social beings while being unique in their personal ways of being. Issues of social representation, communication, dialogical self and human subjectivity are represented in this book. The book contributes to the contemporary epistemological and ethical debate about the question of otherness and would be of interest to educationalists, sociologists, psychologists and anthropologists. It is an invitation to the wide readership to join in this collective effort towards the construction of new conceptions about ourselves and others' relationships that allow for innovative understanding of various social practices and problem solving in society.

Innovating Genesis Emily Abbey, Rainer Diriwächter, 2008-07-01. Cultural psychology is currently in a phase of rapid growth. *Innovating Genesis* is an example of how the most central aspect of any science, its methodology, undergoes revolutionary transformation. Yet in this book we see careful continuity with the past of the discipline. The orientation to study processes of emergence was well prepared by the *Ganzheitspsychologie* tradition in early twentieth century. If we all have learned something about the world since then, it is the inevitable quality of the whole that transcends its parts. Scientists have tried to grasp the general notion of such wholes yet recurrently regressing to the easy illusion that one can reduce the complexities of the *in vivo* events to the scrutinized *in vitro*. By looking to the history of how holistic ideas might help our present investigations, this book demonstrates how contemporary science has something to learn from its own history. The editors of this volume have managed to bring together a creative international team of scholars whom they have guided to be on target of the content matter of the book: innovating the genesis of the methods for the study of psychological emergence.

Transitions Tania Zittoun, 2006-02-01. What do young people do with the novels they read, the films they see, the music they hear and sing? How do these cultural products act as symbolic resources in the process of development? And what can we as researchers learn by studying people's uses of fiction? This monograph approaches development through the study of transitions and the processes of exploration that follow ruptures in people's lives. Specifically, it examines young people's symbolic responsibility as they have to choose among the wide range of cultural products. Societies expose them to. The book thus examines the books, films and music that young people mobilize when they need to redefine their identity, learn informal know-how or have to confer meaning to what happens to them in transitions. The book has a theoretical scope. It draws on cultural psychology and psychoanalysis to formulate the importance of semiotic mediation in thinking, feeling and acting. Its main contribution is to propose a model for analyzing uses of symbolic resources such as books and films in everyday life. It thus shows how uses of symbolic resources can enable new forms of experiences and conduct. It finally highlights social and personal conditions that might facilitate or hinder developmental uses of symbolic resources. The book, based on in-depth case studies, is addressed to scholars, professionals and students in the fields of youth culture and the media, cultural and developmental psychology and life-long education.
