Diamond Social Guide 10th 2015

David Kirk

Diamond Social Guide 10th 2015:

An Analysis of Jared M. Diamond's Collapse Rodolfo Maggio, 2017-07-05 American scholar Jared Diamond deploys his powers of interpretation to great effect in *Collapse: How Societies Choose to Fail or Succeed* which seeks to understand the meaning behind the available evidence describing societies that have survived and those that have withered and died. Why, for example, did the Norsemen of Scandinavia who colonized Greenland in the early tenth century not survive while the inhabitants of Highland New Guinea did? With the evidence to hand, Diamond notes that a society's collapse tends to be preceded by a severe reduction in population and considerable decreases in political, economic, and social complexity. Delving even deeper, Diamond isolates five major factors that determine the success or failure of human societies in all periods of history: environmental degradation which occurs when an ecosystem deteriorates as its resources are exhausted; climate change, natural or man-made; hostile neighbors; weakened trading partners; and access or otherwise to the resources that enable the society to adapt its challenges. The breadth of Diamond's research provides the springboard from which to reach these definitions, but it inevitably also introduces complications: how can evidence produced by specialists in so many different disciplines be compared? Diamond's ability to understand the meaning of the evidence at hand and his readiness to seek and supply clarifications of meaning where necessary underpin his achievement and comprise a textbook example of how interpretative skills can provide a framework for strong critical thinking.

Disability, Human Rights, and Information Technology Jonathan Lazar, Michael Ashley Stein, 2017-06-22 *Disability, Human Rights, and Information Technology* addresses the global issue of equal access to information and communications technology (ICT) by persons with disabilities. The right to access the same digital content at the same time and at the same cost as people without disabilities is implicit in several human rights instruments and is featured prominently in Articles 9 and 21 of the Convention on the Rights of Persons with Disabilities. The right to access ICT moreover invokes complementary civil and human rights issues: freedom of expression, freedom of information, political participation, civic engagement, inclusive education, the right to access the highest level of scientific and technological information, and participation in social and cultural opportunities. Despite the ready availability and minimal cost of technology to enable people with disabilities to access ICT on an equal footing as consumers without disabilities, prevailing practice around the globe continues to result in their exclusion. Questions and complexities may also arise where technologies advance ahead of existing laws and policies where legal norms are established but not yet implemented or where legal rights are defined but clear technical implementations are not yet established. At the intersection of human-computer interaction, disability rights, civil rights, human rights, international development, and public policy, the volume's contributors examine crucial yet underexplored areas including technology access for people with cognitive impairments, public financing of information technology, accessibility and e-learning, and human rights and social inclusion. Contributors: John Bertot, Peter Blanck, Judy Brewer, Joyram Chakraborty, Tim Elder, Jim Fruchterman, G. Anthony Giannoumis.
