Gulbrandsen,2012-03-01 Botswana has been portrayed as a major case of exception in Africa as an oasis of peace and harmony with an enduring parliamentary democracy blessed with remarkable diamond driven economic growth Whereas the failure of other states on the continent is often attributed to the prevalence of indigenous political ideas and structures the author argues that Botswana's apparent success is not the result of Western ideas and practices of government having replaced indigenous ideas and structures Rather the postcolonial state of Botswana is best understood as a unique complex formation one that arose dialectically through the meeting of European ideas and practices with the symbolism and hierarchies of authority rooted in the cosmologies of indigenous polities and both have become integral to the formation of a strong state with a stable government Yet there are destabilizing potentialities in progress due to emerging class conflict between all the poor sections of the population and the privileged modern elites born of the expansion of a beef and diamond driven political economy in addition to conflicts between dominant Tswana and vast other ethnic groups These transformations of the modern state are viewed from the long term perspectives of precolonial and colonial genealogies and the rise of structures of domination propelled by changing global forces *Blood, Sweat and Earth* Tijl Vanneste,2021-09-16

A sweeping history of our enduring passion for diamonds and the exploitative industry that fuels it Blood Sweat and Earth is a hard hitting historical exposé of the diamond industry focusing on the exploitation of workers and the environment the monopolization of uncut diamonds and how little this has changed over time It describes the use of forced labor and political oppression by Indian sultans Portuguese colonizers in Brazil and Western industrialists in many parts of Africa as well as the hoarding of diamonds to maintain high prices from the English East India Company to De Beers While recent discoveries of diamond deposits in Siberia Canada and Australia have brought an end to monopolization the book shows that advances in the production of synthetic diamonds have not yet been able to eradicate the exploitation caused by the world's

unquenchable thirst for sparkle **Africa for Sale?**,2013-06-15 The past several decades have witnessed a rise in foreign and domestic investments in Africa's arable land While such land projects are currently the focus of widespread media and scholarly interest the role of the state in driving negotiating and facilitating these acquisitions deserves closer attention This book analyzes how state land policies stakeholder interactions and privatization schemes interact to facilitate large scale land acquisitions It includes a study of the various forms of state intervention the influence of foreign agencies governments and private entities and a look at how states interact with local populations The inclusion of case studies in settings throughout the African continent should attract the interest of both an academic and non academic readership **Routledge**
