Integrative Neurology John W. McBurney, Ilene S. Ruhoy, 2020 Dementia Parkinson s Disease headache and neuropathy are all conditions for which narrowly focused medical interventions all too often fall short The first book in its field Integrative Neurology synthesizes complementary modalities with state of the art medical treatment to offer a new vision for neurological care The authors

begin by looking inward at the crisis of stress and burnout that confronts all of medicine but neurology in particular. It goes on to provide a selective yet in depth review of important topics in neurological practice from the perspective of integrative medicine. Taking an evidence based approach throughout, chapters cover chronic diseases such as Multiple Sclerosis, Dementia and Parkinson's Disease. The volume also addresses clinical issues such as headache, traumatic brain injury, navigating the endocannabinoid system and aging, nutrition and stroke, neuropathy, toxins and neurodevelopment as well as the modalities of Ayurvedic Medicine and acupuncture. Integrative medicine is defined as a healing oriented medicine that takes account of the whole person, body, mind and spirit as well as all aspects of lifestyle. It emphasizes the therapeutic relationship and makes use of appropriate therapies both conventional and alternative. Series editor Andrew Weil MD is Professor and Director of the Arizona Center for Integrative Medicine at the University of Arizona. Dr. Weil's program was the first such academic program in the US and its stated goal is to combine the best ideas and practice of conventional and alternative medicine into cost effective treatments without embracing alternative practices uncritically.

Integrative Therapies in Lung Health and Sleep Linda Chlan, Marshall I. Hertz, 2012-01-06. Integrative Therapies in Lung Health and Sleep provides an overview of integrative therapies to assist clinicians caring for patients with acute or chronic lung diseases and sleep disorders, emphasizing the scientific bases for these therapies and their implementation into clinical practice. This volume focuses on complementary and alternative medicine (CAM) treatments, modalities and practices that are integrated with conventional medical treatment and for which there is some evidence of safety and efficacy. Whole Medical Systems with a specific focus on Traditional Chinese Medicine are also addressed. Individual chapters are devoted to specific health conditions or illnesses, addressing the current state of the science in the four organizing CAM domains including available information regarding benefits, risks or safety considerations. Unique aspects of this volume are the chapters related to evaluation of the evidence base for integrative therapies, new animal model research with herbal preparations, focused on the serious problem of sepsis in the ICU, guidance for counseling patients with chronic lung illnesses who may be desperate for a cure and palliative and end of life care for patients with chronic lung conditions. Clinicians in various health care settings will find Integrative Therapies in Lung Health and Sleep beneficial in their practice, particularly as the use of integrative therapies becomes more widespread.
