of Solar Energy G. N. Tiwari, Arvind Tiwari, Shyam, 2016-06-27 This handbook aims at providing a comprehensive resource on solar energy. Primarily intended to serve as a reference for scientists, students and professionals, the book in parts can also serve as a text for undergraduate and graduate course work on solar energy. The book begins with availability, importance and applications of solar energy, definition of sun and earth angles and classification of solar energy as thermal and photon energy. It then goes on to cover day lighting parameters, laws of thermodynamics including energy and exergy analysis, photovoltaic modules and materials, PVT collectors and applications such as solar drying and distillation. Energy conservation by solar energy and energy matrices based on overall thermal and electrical performance of hybrid system are also discussed. Techno-economic feasibility of any energy source is the backbone of its success and hence economic analysis is covered. Some important constants such as exercises and problems increase the utility of the book as a text.

Mechanical and Electrical Equipment for Buildings Walter T. Grondzik, Alison G. Kwok, 2014-10-06 The definitive guide to environmental control systems updated with emerging technology and trends. The Interactive Resource Center is an online learning environment where instructors and students can access the tools they need to make efficient use of their time while reinforcing and assessing their understanding of key concepts for successful understanding of the course. An access card with redemption code for the online Interactive Resource Center is included with all new print copies or can be purchased separately. If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. ISBN 9781118996164. The online Interactive Resource Center contains resources tied to the book such as Interactive Animations, Interactive Self tests, Interactive Flashcards, Case Studies, Respondus Testbank, instructors only Instructor's Manual over 200 pages including additional resources, Instructors only Roadmap to the 12th Edition, Instructors only Student Guide to the Textbook. Mechanical and Electrical Equipment for Buildings Twelfth Edition is the industry standard reference that comprehensively covers all aspects of building systems. With over 2,200 drawings and photographs, the book discusses basic theory, preliminary building design guidelines and detailed design procedure for buildings of all sizes. The updated twelfth edition includes over 300 new illustrations plus information on the latest design trends, codes and technologies while the companion website offers new interactive features including animations, additional case studies, quizzes and more. Environmental control systems are the components of a building that keep occupants comfortable and help make the building work. Mechanical and Electrical Equipment for Buildings covers both active controls like air conditioners and heaters as well as passive controls like daylighting and natural ventilation. Because these systems comprise the entire energy use and costs of a building's life, the book stresses the importance of sustainability considerations during the design process by both architects and builders. Authored by two leading green design educators, MEEB provides the most current information on low energy architecture including topics like Context, comfort and environmental resources, Indoor air quality and thermal control, Illumination, acoustics and electricity, Fire protection, signal systems and transportation.

Occupant comfort and building usability are the most critical factors in the success of a building design and with environmental concerns mounting it s becoming more and more important to approach projects from a sustainable perspective from the very beginning As the definitive guide to environmental control systems for over 75 years Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike *Building Services Journal* ,2006
