Elizabeth in 1973 and died at his home in Comox B C on Christmas Day 1976 Fury and Ice Peter Harmsen,2024-09-15 Harmsen makes a convincing argument that the occupation of Greenland fits within the broader narrative of the war and is just as important to remember and understand as bigger events that overshadow it recommended for readers of all levels scholarly or casual The Journal of America s Military Past The wartime interest in Greenland was a direct result of its vital strategic position if you wanted to predict the weather in Europe you had to have men in place on the vast frozen island The most celebrated example of Greenland s crucial contribution to Allied meteorological services is the correct weather forecast in June 1944 leading to the decision to launch the invasion of Normandy In addition both before and after D Day a stream of weather reports from Greenland was essential for the Allied ability to carry out the bombing offensive against Germany The Germans were aware of the value of Greenland from a meteorological point of view and they repeatedly attempted to establish semi permanent weather stations along the sparsely populated east coast of the island This resulted in an epic cat and mouse game in which US Coast Guard personnel assisted by a celebrated sledge patrol manned by Scandinavian adventurers struggled to locate and eliminate German bases before they could make any difference It s a story seldom told but the fact remains that Greenland was the only part of the North American continent in which German troops maintained a presence throughout almost the entirety of the war At the same time the US entry into the war triggered an enormous American effort to hastily establish the necessary infrastructure in the form of harbors and air bases that enabled Greenland to form a vital link in the effort to send men and supplies across the North Atlantic in the face of stern opposition from the German Navy While Allied ships were passing through Greenland waters in massive numbers planes were plying the so called Snowball Route from Greenland over Iceland to the British Isles This gave rise to number of tragic incidents such as the sinking of the transport ship SS Dorchester off Greenland in February 1942 leading to the deaths of 674 out of 904 men on board including the Four Chaplains representing the Methodists the Reformed Church the Catholic Church and Judaism who gave up their life jackets to save others In July the same year in one of the most massive forced landings in history the lost squadron six P 38 Lightning fighter aircraft and two Flying Fortresses crash landed on a Greenland glacier *In Search of Geraldine Moodie* Geraldine Moodie,Donny White,University of Regina.
