Diaspora Merchants In The Black Sea:

Diaspora Merchants in the Black Sea Vasilēs A. Kardasēs, 2001-01-01 Presented here for the first time in English this richly detailed study based on British French Greek and Russian archival sources tells the story of the powerful Greek trading houses that competed successfully with North America to feed the industrializing population of Western Europe Vassilis Kardasis presents this commercial history by charting the rise of Greek merchant houses to a position of dominance over the export of trade in Russian grain Though the Greeks would eventually cede their dominance to the competition of cheaper American grain in the second half of the nineteenth century their influence was felt in the transformation of Southern Russia to productive agricultural land and the formation of large Black Sea port cities which would eventually encourage massive immigration Diaspora Merchants in the Black Sea fills an important gap in our understanding of the role of the diasporic Greek community in southern Russian history the history of Greek maritime activity and ultimately the history of economic relations between Eastern and Western Europe Merchant Colonies in the Early Modern Period Victor N Zakharov, Gelina Harlaftis, Olga Katsiardi-Hering, 2015-10-06 Merchant colonies were a significant factor for economic growth in Europe during the early modern period The essays in this collection look at merchant colonies across Europe assessing their function legal status interaction with local traders and assimilation into their host countries Greek Maritime History, 2022-05-02 This volume presents Greek Maritime History and unravels the historical trajectory of a maritime nation par excellence in the Eastern Mediterranean At the core of the book lies the rise of the Greek merchant fleet and its transformation from a peripheral to an international carrier Following the evolution of Greek shipping for more than three centuries 17th 20th century the book traces a maritime nation in its making and provides proof of a different yet successful pattern of maritime development compared to other European maritime nations The chapters adopt a multidimensional and interdisciplinary approach spanning from shipping fishing and trade to piracy technology human resources and entrepreneurship and reflect the main directions of Greek maritime historiography over the last thirty years Contributors are Apostolos Delis Dimitris Dimitropoulos Zisis Fotakis Katerina Galani Gelina Harlaftis Evdokia Olympitou Gerassimos D Pagratis Alexandra Papadopoulou Socrates Petmezas Evrydiki Sifneos Anna Sydorenko Ioannis Theotokas and Katerina Vourkatioti **Agrarian, Commercial, and Maritime Change in the Southeastern Black Sea Region** Ekin Mahmuzlu, 2025-01-27 Economic historians have often examined the effects of the integration of the Ottoman Empire into the world markets with macro level approaches This book aims to scrutinize the effects of this transition to a capitalist economy through a micro level approach instead using micro level data and microeconomics It examines the structure of agricultural production and commerce by analyzing major crops and commercial institutions before assessing agrarian commercial and maritime changes at the micro level Utilizing recent developments in economic history institutional economics and ecological economics it explores the causality behind these agrarian and commercial changes **Imperial Odessa: Peoples, Spaces,**

Identities Evrydiki Sifneos, 2017-09-25 Imperial Odessa Peoples Spaces Identities is a book about a cosmopolitan city written by a cosmopolitan scholar with a literary flair Evrydiki Sifneos conceives Odessa as more of a fin de siècle east Mediterranean port metropolis than as a provincial port city of the Russian Empire in the nineteenth century due to two of its principal characteristics its function as a hub of international trade and travel and the multi ethnic character of its inhabitants The book unfolds around two interpenetrating axes The first one introduces a new peripatetic approach that discovers the space of the city and the other the one that has given it its dynamic is the socio economic transformations that germinated within the political changes

A History of the Global Wheat Trade Marco Bertilorenzi, Carlo Fumian, Giovanni Gozzini, 2025-04-29 During the second half of the 19th century a new global market for wheat came to the fore Ever since scarce and perishable food has been transformed into a modern global commodity millions of tons of which is sold bought and transported across the oceans providing the daily bread for a fast growing world population This book explores the historical origin of the global wheat market offering an actor centred view of the history of this new global commodity The contributions to this volume demonstrate that the development of the global wheat trade through the late 19th and early 20th centuries has not only impacted the world food regime it also led to the dissemination of new economic institutions

Countless technological innovations such as elevators or telegraphic lines have paved the way to the creation of new financial tools for trade such as futures and grain exchanges which transformed the market. The book also examines new global actors such as Cargill, Louis Dreyfus or Bunge y Born who took advantage of the new opportunities provided by the interlinked and globalized world grain trade. For the first time in history the price of a single commodity which was crucial for human life ended up being decided in the areas of production by the producers and started to be fixed further afield in specific and anonymous trading places. The book will be of great interest to historians of economics, business, trade, agriculture, globalization and commodities.

Homelands and Diasporas Minna Rozen, 2008-10-30. The Greek and Jewish diasporas are the most significant diasporas of Western civilisation. *Homelands and Diasporas* is the first book to explore the similarities and differences between these two experiences. In the process it sheds fascinating light on their fundamental importance for both Greek and Jewish societies. The authors examine Greek and Jewish diasporas throughout history from classical and Biblical times to the present and all over the world in Greece, the Balkans, Turkey, Russia, the Near and Middle East, Spain and the US. They analyse the very nature of diaspora, examining both the Greek concept of noble expansion and the Jewish idea of enforced exile, and analyse community structures as well as social and religious networks, combining Scriptural analysis with cultural and political history. Diaspora is a difficult and emotive concept but *Homelands and Diasporas* offers a balanced and perceptive guide to the connected histories of these two peoples away from their homelands.

North Eurasian Trade in World History, 1660-1860 Werner Scheltjens, 2021-07-29. This book offers the first long term analysis of the protracted struggle between Britain, France, Prussia, Russia and Sweden for economic power and political influence in the northern part of the Eurasian continent between 1660 and 1860. This book shows how their commercial, diplomatic and military entanglements determined the course of Baltic trade from the late seventeenth to the mid nineteenth century, provoking among other things the decline of the Dutch Republic and the partitions of Poland, Lithuania. The author conceptualizes the Baltic Sea as one of North Eurasia's western border basins alongside the White, Black and Caspian Seas and employs novel statistical series of Baltic trade as a proxy for the long term development of North Eurasian trade in world history. Based on extensive quantitative evidence and sources for the history of international relations, this book outlines how North Eurasian trade became an object of growing tensions between various larger and smaller powers with a stake in North Eurasia's riches. The book addresses the long term impact of mercantilist policies, territorial greed and military conflicts in North Eurasia's border basins and accentuates the significance of developments in the preindustrial transport and commercial infrastructure of the North Eurasian landmass. Employing the concept of North Eurasia and its different borderlands and border basins, this book overcomes previous limitations in the historiography of globalization and sheds light on a large continental landmass which researchers tend to leave aside for the benefit of a predominant maritime perspective in historical studies of globalization. *North Eurasian Trade in World History 1660-1860* will be invaluable reading for students.
