

STEM STITCH

Also known as **crystal stitch**, **stem stitch** and **French hemstitch stitch**.

Stem stitch is one of the most frequently used needle stitches. It is quick and easy to work and follows intricate curves and linear designs well. Each stitch should be kept evenly sized and of an even size. A backwater needle line can be made by inserting the needle into the fabric at a right angle, instead of directly into the line to be covered by the stitches.

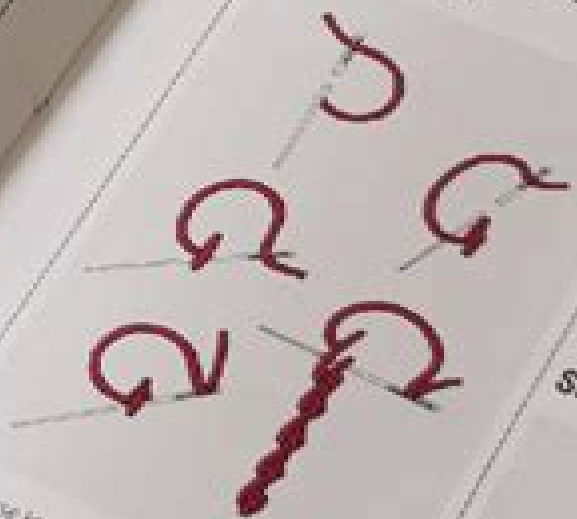

Work stem stitch smoothly, with a simple forward and backward motion along the line. It is often always keeping the working thread in the right of the needle. When the thread is kept to the left of the needle, the effect of the stitch is slightly different and it is then known as **crystal stem stitch**.

WHIPPED STEM STITCH

Whipped stem stitch makes a stronger line than ordinary stem stitch (above). Use it when you want a heavy outline which will follow a complex design well. The stitch can be made more decorative if a contrasting color and texture

PORTUGUESE KNOTTED STEM STITCH

Portuguese knotted stem stitch makes a knotted effect on the line which is accentuated when it is stitched in a thick, twisted thread such as perle cotton. This stitch is ideal for outlining designs where a heavy effect is required. Work this stitch with a needle and thread of a contrasting color to the background fabric.

Stem stitch is used for the following purposes. The effect created by whipped stem stitch depends on the choice of whipping thread. When a heavy, twisted thread is used, the stitching looks like a French hemstitch. When a fine thread is used, the result is a flat, smooth surface with a contrasting color. First work a foundation row of ordinary stem stitch, then work this row with a second thread without picking up any ground fabric. Use a third thread to create a decorative border for the stitching intended to work within the design. In the foundation row

Outline stitch is a versatile product for outlining and for letter designs as it follows a single or multiple rows. The effect depends on the thread used, depending on the design. The stitch should be kept quite even size, and should be really straight. Work this stitch in the same way as stem stitch, but always keep the working thread out of the needle. The stitched will follow the outline of the design.
