Dictionnaire Pens E Cologique Dominique Bourg:

Decolonial Ecology Malcom Ferdinand, 2021-11-11 The world is in the midst of a storm that has shaped the history of modernity along a double fracture on the one hand an environmental fracture driven by a technocratic and capitalist civilization that led to the ongoing devastation of the Earth's ecosystems and its human and non human communities and on the other a colonial fracture instilled by Western colonization and imperialism that resulted in racial slavery and the domination of indigenous peoples and women in particular In this important new book Malcom Ferdinand challenges this double fracture thinking from the Caribbean world Here the slave ship reveals the inequalities that continue during the storm some are shackled inside the hold and even thrown overboard at the first gusts of wind Drawing on empirical and theoretical work in the Caribbean Ferdinand conceptualizes a decolonial ecology that holds protecting the environment together with the political struggles against post colonial domination structural racism and misogynistic practices Facing the storm this book is an invitation to build a world ship where humans and non humans can live together on a bridge of justice and shape a common world It will be of great interest to students and scholars in environmental humanities and Latin American and Caribbean studies as well as anyone interested in ecology slavery and de colonization **Penser l'écologie**

Wallenhorst, 2023-09-15 This volume which is rooted in biogeophysical studies addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post Promethean approach This work explores the idea of an anthropological mutation of political consolidation from a post Promethean togetherness to creating the capacity to act together The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure This has three dimensions hubris the world and coexistence referring respectively to the logic of profit of the homo oeconomicus the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religatus The intellectual and political attitude outlined in this book is an extension of critical theory the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it the ultimate goal being social transformation The author proposes an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non human The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for hope despite this heritage of the

Anthropocene In addition to Arendtian thinking this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet Hartmut Rosa Andreas Weber Dominique Bourg and Christian Arnsperger This volume is of interest to researchers in the Anthropocene
