Concepts of Programming Languages Robert W. Sebesta,2012-02-28 This is the eBook of the printed book and may not include any media website access codes or print supplements that may come packaged with the bound book For undergraduate students in Computer Science and Computer Programming courses Now in its Tenth Edition Concepts of Programming Languages introduces students to the main

constructs of contemporary programming languages and provides the tools needed to critically evaluate existing and future programming languages. Readers gain a solid foundation for understanding the fundamental concepts of programming languages through the author's presentation of design issues for various language constructs, the examination of the design choices for these constructs in some of the most common languages, and critical comparison of the design alternatives. In addition, Sebesta strives to prepare the reader for the study of compiler design by providing an in-depth discussion of programming language structures, presenting a formal method of describing syntax, and introducing approaches to lexical and syntactic analysis.

Declarative Agent Languages and Technologies X Matteo Baldoni, Louise Dennis, Viviana Mascardi, Wamberto Vasconcelos, 2013-04-15. This book constitutes the thoroughly refereed post-proceedings of the 10th International Workshop on Declarative Agent Languages and Technologies DALT 2012 held in conjunction with the 11th International Joint Conference on Autonomous Agents and Multiagent Systems AAMAS 2012 at Valencia, Spain, in June 2012. The volume contains 13 revised selected papers presented at DALT 2012. The papers cover the following topics: declarative languages and technologies; computational logics; declarative approaches to engineering agent-based systems; models of business interactions among agents; and models of trust, commitments, and reputation for agents.
