Copyright Office, 1977 **MOLECULAR STRUCTURE AND SPECTROSCOPY, Second Edition** ARULDHAS, G., 2007-06-09 Designed to serve as a textbook for postgraduate students of physics and chemistry, this second edition improves the clarity of treatment, extends the range of topics and includes more worked examples with a view to providing all the material needed for a course in molecular spectroscopy from first principles to the very useful spectral data that comprise figures, charts and tables. To improve the conceptual appreciation and to help students develop more positive and realistic impressions of spectroscopy, there are two new chapters: one on the spectra of atoms and the other on laser spectroscopy. The chapter on the spectra of atoms is a detailed account of the basic principles involved in molecular spectroscopy. The chapter on laser spectroscopy covers some new experimental techniques for the investigation of the structure of atoms and molecules. Additional sections on interstellar molecules, inversion vibration of ammonia molecule, fibre coupled Raman spectrometer, Raman microscope, supersonic beams and jet cooling have also been included. Besides worked out examples, an abundance of review questions and end of chapter problems with answers are included to aid students in testing their knowledge of the material contained in each chapter. Solutions manual containing the complete worked out solutions to chapter end problems is available for instructors.

Physics for Scientists & Engineers with Modern Physics Douglas C. Giancoli, 2008 Physics for Scientists and Engineers Paul M. Fishbane, Stephen Gasiorowicz, Stephen T. Thornton, 1996 Appropriate for any introductory calculus based physics course, Fishbane, Gasiorowicz, Thornton is a comprehensive introduction to calculus based physics. The most successful first edition physics text of the last decade, it is the only book written specifically to address the main issue in this course: namely, balancing the needs and wants of the students with those of the instructor. The authors, experienced researchers and teachers, represent both theoretical and experimental physicists. This text presents a balance between theory and applications, between concepts and problem solving, between mathematics and physics, and finally between technology and traditional pedagogical methods. Appropriate for both scientists and engineers with increased applications for
