Case Studies of Rehabilitation, Repair, Retrofitting, and Strengthening of Structures Mourad M. Bakhoun, 2010

Concrete Solutions Michael Grantham, 2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions the 6th International Conference on Concrete Repair Thessaloniki Greece 20-23 June 2016. Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo France in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua Italy in 2009 with TU Dresden Germany in 2011 and with Queen's University Belfast Northern Ireland in 2014. In 2016 Thessaloniki Greece hosted the conference partnering with both Aristotle University of Thessaloniki AUTH and Democritus University of Thrace DUTH. The next conference in the series will be held in 2019 in Istanbul.

Construction Materials Manuel Bustillo Revuelta, 2021-03-02 Construction Materials is a comprehensive textbook covering all raw materials and products related to the construction processes and not only those applied to building structures. The book is organized to help readers achieve competent knowledge about construction materials. At the beginning of the book the author offers the general concepts, definitions and standards adopted worldwide for these materials to be used along the book. The central part of the text covers the primary construction materials required to manufacture concrete and mortars, the most relevant construction materials in the last century. Expressly concrete and mortar are treated in detail in dedicated chapters per component. In addition the author addresses other relevant materials in construction such as ceramic materials, metals and alloys, bituminous materials and geosynthetic materials. Finally, since the construction industry is one of the largest single waste producing sector in the world, the last chapter outlines the main types and characteristics of construction and demolition waste, e.g. recycled aggregates. The book appeals to students but also professionals interested in construction materials and construction and civil engineering.

International Bridge Industry Guide, **Sprayed Concrete Technology** Simon Austin, 2002-11-01 The process of spraying concrete is one of the most versatile concrete placing techniques and is used in a wide range of applications from construction of new tunnels, domes, tanks and pools to repair and strengthening of existing structure. The steady growth in interest and application in the technique is reflected in this book which brings t
