Danger Death And Disaster In The Crowsnest Pass Mines 1902 1928:

Danger, Death and Disaster in the Crowsnest Pass Mines, 1902-1928 Karen Lynne Buckley, 2004 The Crowsnest Pass is famous for the tragic rock slide at Frank in 1903 but almost as famous are the many coal mining tragedies that afflicted the region in the early twentieth century With the discovery of a rich coal deposit in the region the area underwent an economic boom and a spike in population that is still evidenced today Unfortunately with this type of mining in rugged and often dangerous conditions comes the threat of disaster and occasionally death This book examines carefully the various calamities that have afflicted the area and considers the impact on the inhabitants and victims of these numerous tragedies Using original source material such as grave markers folk songs and oral histories the author portrays vividly the psychological and sociological features of both the individual and collective responses to death and danger giving the reader a unique picture of mining communities that is as true today as it was a century ago **An Accidental History of Canada**

Megan J. Davies, Geoffrey L. Hudson, 2024-07-15 Although Canadian history has no shortage of stories about disasters and accidents the phenomena of risk upset and misfortune have been largely overlooked by historians Disasters get their due but not so the smaller scale accident where fate is more intimate Yet such events often have a vivid afterlife in the communities where they happen and the way in which they are explained and remembered has significant social cultural and political meaning An Accidental History of Canada brings together original studies of an intriguing range of accidents stretching from the 1630s to the 1970s These include workplace domestic childhood and leisure accidents in colonial Indigenous rural and urban settings Whether arising from colonial power relations urban dangers perils in resource extraction or hazardous recreations most accidents occur within circumstances of vulnerability and reveal precarity and inequities not otherwise apparent Contributors to this volume are alert to the intersections of the settler agenda and the elevation of risk that it brings Indigenous and settler ways of understanding accidents are juxtaposed with chapters exploring the links between accidents and the rise of the modern state An Accidental History of Canada makes plain that whether they are interpreted as an intervention by providence a miscalculation an inevitability or the result of observable risk accidents and our responses to them reveal shared values Singing Death Helen Dell, Helen M. Hickey, 2017-04-21 Death is an unanswerable question for

humanity the question that always remains unanswered because it lies beyond human experience Music represents one of the most profound ways in which humanity struggles nevertheless to accommodate death within the scope of the living by giving a voice to death and the dead and a voice that responds This book engages with the question of how music expresses and responds to the profound existential disturbance that death and loss present to the living Each chapter offers readers an encounter with music as a way of speaking or responding to human mortality Each chapter in its own way addresses these questions How are death and the dead made present to us through music How does music as composed performed and heard respond to the brute fact of death for the living the dying and the bereaved These questions are addressed from a wide range

of disciplinary perspectives musicology ethnomusicology literature history philosophy film studies psychology and psychoanalysis Singing Death also covers a wide range of musical genres from medieval love song to twenty first century horror film music The collection is accompanied by a website including some of the music associated with each of its chapters
