Date Onomics How Dating Became A Lopsided Numbers Game:

Date-onomics Jon Birger, 2015-08-25 It's not that he's just not that into you; it's that there aren't enough of him. And the numbers prove it. Using a combination of demographics, statistics, game theory, and number crunching, Date onomics tells what every single college-educated heterosexual looking for a partner woman needs to know. The man deficit is real. It's a fascinating if sobering read with two critical takeaways. One: it's not you. Two: knowledge is power, so here's what to do about it. The shortage of college-educated men is not just a big city phenomenon frustrating women in New York and L.A. Among young college grads, there are four eligible women for every three men nationwide. This unequal ratio explains not only why it's so hard to find a date but a host of social issues, from the college hookup culture to the reason Salt Lake City is becoming the breast implant capital of America. Then there's the math that says that a woman's good looks can keep men from approaching her, particularly if they feel the odds aren't in their favor. Fortunately, there are also solutions: what college to attend, any with strong sciences or math; where to hang out in New York (try a fireman's bar); where to live (Colorado, Seattle, Man Jose); and why never to shy away from giving an ultimatum.

Love And . . . Jen Kim, 2018-02-13 Unique, compelling, and at times ridiculous insights and lessons from the realm of romance. Why is dating so hard? Has Disney screwed us up? How many times have you entered into a new relationship immediately convinced that this person was the one? At last, you've met the partner who will complete you; you make you feel like all those previous terrible relationships were somehow worth it, and finally complete your fantasy rom-com happy ending. Your inner Jennifer Aniston already squealing with delight. How many times has that relationship abruptly veered off course, leaving your heart the victim of yet another romantic fatality? In her first book, *Love and Jen*, Kim turns to science to make sense of why, after three decades, she hasn't been able to find lasting love. She puts a lens to the destructive pathology of her relationships, including her current long-term relationship with a partner who just isn't ready for the next level and honestly may never be. Will they or won't they end up together? You'll learn the prognosis by the final page. *Love and Jen* is a relationship self-help book that doesn't want you to change, mostly because it's really hard to change, and because you probably don't want to. Kim focuses on the science and psychology behind why we behave the way we do, reserving judgement for no one but herself.

When Did We All Become Middle Class? Martin Nunlee, 2016-08-05 In *When Did We All Become Middle Class*, Martin Nunlee discusses how a lack of class identity gives people a false sense of their relationship to power, which has made the U.S. population accept the myth that they live in a meritocracy. This book examines social class within the framework of psychological tendencies, everyday interactions, institutions, and pervasive cultural ideas to show how Americans have shifted from general concerns of social and economic equality to fragmented interests and groups. Written in a conversational style, this book is a useful tool for undergraduate courses covering social class, such as inequality, stratification, poverty, and social problems.

Inhorn, 2025-05-06 Answers the question Why are women freezing their eggs Why are women freezing their eggs in record numbers Motherhood on Ice explores this question by drawing on the stories of more than 150 women who pursued fertility preservation technology Moving between narratives of pain and empowerment these nuanced personal stories reveal the complexity of women's lives as they struggle to preserve and extend their fertility Contrary to popular belief egg freezing is rarely about women postponing fertility for the sake of their careers Rather the most educated women are increasingly forced to delay childbearing because they face a mating gap a lack of eligible educated equal partners ready for marriage and parenthood For these women egg freezing is a reproductive backstop a technological attempt to bridge the gap while waiting for the right partner But it is not an easy choice for most Their stories reveal the extent to which it is logistically complicated physically taxing financially demanding emotionally draining and uncertain in its effects In this powerful book women share their reflections on their clinical encounters as well as the immense hopes and investments they place in this high-tech fertility preservation strategy Race religion and the role of men in the lives of single women pursuing this technology are also explored A distinctly human portrait of an understudied and rapidly growing population Motherhood on

One by One Gina Dalfonzo, 2017-06-20 There are now more single adults than married adults in the United States yet the evangelical church continues to focus primarily on serving couples and families with ministries geared toward their particular needs This can lead however unintentionally to the marginalization of adults who are single by choice divorce or death or who are simply not yet married Families are a good thing but so are all of God's people and singles long to be lovingly integrated into the Body of Christ In *One by One* Gina Dalfonzo explores common misconceptions and stereotypes about singles including the idea that they must be single because something is wrong with them and the subtle and not so subtle ways they are devalued like when sermons focus overmuch on navigating marital relationships or raising children She shows how the church of Paul who commended those who remained single became the church where singles are too often treated like second class Christians Then she explores what the church is doing right what unique services singles can offer the church and most importantly what the church can do to love and support the singles in their midst
