Concept Mapping In Mathematics Research Into Practice:

Concept Mapping in Mathematics Karoline Afamasaga-Fuata'i, 2009-04-21 Concept Mapping in Mathematics Research into Practice is the first comprehensive book on concept mapping in mathematics. It provides the reader with an understanding of how the meta cognitive tool namely hierarchical concept maps and the process of concept mapping can be used innovatively and strategically to improve planning teaching learning and assessment at different educational levels. This collection of research articles examines the usefulness of concept maps in the educational setting with applications and examples ranging from primary grade classrooms through secondary mathematics to pre service teacher education undergraduate mathematics and post graduate mathematics education. A second meta cognitive tool called vee diagrams is also critically examined by two authors particularly its value in improving mathematical problem solving. Thematically the book flows from a historical development overview of concept mapping in the sciences to applications of concept mapping in mathematics by teachers and pre service teachers as a means of analyzing mathematics topics planning for instruction and designing assessment tasks including applications by school and university students as learning and review tools. This book provides case studies and resources that have been field tested with school and university students alike. The findings presented have implications for enriching mathematics learning and making problem solving more accessible and meaningful for students. The theoretical underpinnings of concept mapping and of the studies in the book include Ausubel's cognitive theory of meaningful learning constructivist and Vygotskian psychology to name a few. There is evidence particularly from international studies such as PISA and TIMSS and mathematics education research which suggest that students mathematical literacy and problem solving skills can be enhanced through students collaborating and interacting as they work discuss and communicate mathematically. This book proposes the meta cognitive strategy of concept mapping as one viable means of promoting communicating and explicating students mathematical thinking and reasoning publicly in a social setting e.g. mathematics classrooms as they engage in mathematical dialogues and discussions. Concept Mapping in Mathematics Research into Practice is of interest to researchers graduate students teacher educators and professionals in mathematics education.

Presenting Children to Maths: Stronger Character for Better Learning David Shattock,2023-09-22

Mathematics is not a universally popular subject neither within nor outside of school There are those who love it but many do not and it is not uncommon for people to take a perverse pride in being bad at it This book argues that while much needed

improvements to mathematics teaching are necessary to address such issues they are insufficient without also imbuing children with the character required to learn it effectively Teachers of mathematics are responsible not only for applying skilful pedagogy but also for developing a productive learning culture within the mathematics classroom We need to consider the emotional and social impact on children of teachers own attitudes and beliefs about mathematics and how children should be taught it Sometimes provocative and irreverent but always stimulating and lucid Presenting Children to Maths is an original and profound discussion about how students ability and success in mathematics depends largely on how their disposition and will are shaped towards learning it
