The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 1, Structures, Spaces, and Boundary Making J. R. McNeill, Kenneth Pomeranz, 2015-04-30 Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind The first book examines structures spaces and processes within which and through which the modern world was created including the environment energy technology population disease law industrialization imperialism decolonization nationalism and socialism along with key world regions

Symbolic Power in the World Trade Organization Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law *Symbolic Power in the WTO* not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope *Global History Globally* addresses this lacuna by surveying the state of global history in different world regions Divided into

three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history
