[Introduction to Landscape Design](#) John L. Motloch, 2000-08-25 Outstanding explorations of design concepts principles and processes This Second Edition of Introduction to Landscape Design offers even broader coverage of the environmental human technological and aesthetic issues associated with landscape design than the first edition Beginning with the way we perceive manage and design the landscape it moves on to explore the forces that influence land design An overview of landscape management planning and design includes a discussion of the roles and integration of the professions involved modes of professional practice and site scale design processes The book explores the ecology of design and the integration of land design decisions into dynamic systems This fully updated new edition Presents landscape design as a synergism of art and science Addresses the interplay between buildings and sites Provides insights into the breadth of people environment relationships Places special emphasis on our growing understanding of interrelationships between the landscape and human decisions A superb introduction for students as well as a useful reference for practicing professionals this book is an excellent guide for anyone who wants to develop a better understanding of landscape design

Representing Landscapes Nadia Amoroso, 2019-01-15 The fourth book in Nadia Amoroso's Representing Landscapes series this text focuses on traditional methods of visual representation in landscape architectural education Building on from the previous titles in the series which look at digital and hybrid techniques Representing Landscapes Analogue is a return to the basic foundations of landscape architecture's original medium of visual communication Each of the 20 chapters includes contributions from leading professors teaching studio and visual communication courses from landscape architecture programs across the globe showcasing the best student examples of analog techniques It demonstrates the process from graphics as a form of research design development and analysis to the final presentation through drawings models and descriptive captions of the methods styles and techniques used It features critical and descriptive essays from expert professors and lecturers in the field who emphasise the importance of the traditional medium as an intrinsic part of the research design and presentation process Over 220 full colour images explore the range of visual approaches students and practitioners of landscape architecture can implement in their designs With worked examples in the chapters and downloadable images suitable for class use this is an essential book for visual communication and design studios

Landscape Architecture and Digital Technologies Jillian Walliss, Heike Rahmann, 2016-02-12 Landscape Architecture and Digital Technologies explores how digital technologies are reshaping design and making in landscape architecture While the potentials of digital technologies are well documented within landscape planning and visualisation their application within design practice is far less understood This book highlights the role of the digital model in encouraging a new design logic that moves from the privileging of the visual to a focus on processes of formation bridging the interface of the conceptual and material the virtual and the physical Drawing on interviews and projects from a range of international designers including Sn hetta Arup Gustafson Porter ASPECT Studios Grant Associates Catherine Mosbach Philippe Rahm PARKKIM LAAC and PEG office of landscape architecture among others the authors explore the influence of parametric modelling scripting real time data simulation prototyping fabrication and Building Information Modelling on the design and construction of contemporary landscapes This engagement with practice is expanded through critical reflection from academics involved in landscape architecture programs around the world that are reshaping their research and pedagogy to reflect an expanded digital realm Crossing critical theory technology and contemporary design the book constructs a picture of an emerging twenty first century practice of landscape architecture practice premised on complexity and performance It also highlights the disciplinary demands and challenges in engaging with a rapidly evolving digital context within practice and education The book is of immense value to professionals and researchers and is a key publication for digital landscape courses at all levels

The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century

continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps

Visualizing Landscape Architecture Elke Mertens, 2009-10-16 We don't sell gardens we sell images of gardens This observation on the part of a landscape architect makes it clear just how important it is that a design be effectively communicated to the community clients and the public Drawings models simulations and films communicate the designers proposed ideas and solutions but they also convey their attitude toward the use of nature and the environment With myriad possibilities including computer programs as well as hand drawings and models which continue to be widely used and strong competition in the field there is now a huge variety of visual representations with agreed upon rules but also a great deal of freedom In three large sections this book sifts through the currently commonplace and available techniques and evaluates them in terms of their informative value and persuasive power always illustrating its points with analysis of examples from international firms An introductory look at the development thus far is followed by a systematic presentation of modes of representation in two three and four dimensions in the plane in space and in the temporal process The second section deals with the sequence within the workflow from the initial sketch through concept and implementation planning all the way to the finished product The third section deals with the strategic use of visualizations in the context of competitions future schemes and large scale landscape planning The focus in this section is not on the familiar use of the relevant techniques but rather on the methods and forms of visual representation in contemporary landscape architecture
