Teachers' Guide to the Commodore Computer Susan E. Thrall,Fred A. Springer,1984-09 This book is a clear concise practical guide that allows primary and secondary school teachers to begin teaching with microcomputers even if this is the

teacher's first exposure to microcomputers. The authors explain the operation of the microcomputer and the fundamentals of the programming language BASIC and then guide the teacher into effective classroom applications stressing practical exercises and examples. Designed with the widely used Commodore series PET C64 Vic 20 in mind, this book is specifically for teachers who have not taken a full-length computer course. *Informatics in Schools. Fundamentals of Computer Science and Software Engineering* Sergei N. Pozdniakov, Valentina Dagienė, 2018-10-10. This book constitutes the proceedings of the 11th International Conference on Informatics in Schools: Situation, Evolution and Perspectives ISSEP 2018 held in St. Petersburg, Russia, in October 2018. The 29 full papers presented in this volume were carefully reviewed and selected from 74 submissions. They were organized in topical sections named: role of programming and algorithmics in informatics for pupils of all ages; national concepts of teaching informatics; teacher education in informatics; contests and competitions in informatics; socio-psychological aspects of teaching informatics; and computer tools in teaching and studying informatics. Teaching Fundamental Concepts of Informatics Juraj Hromkovič, Rastislav Královic, Jan Vahrenhold, 2009-12-02. The International Conference on Informatics in Secondary Schools: Evolution and Perspective ISSEP is an emerging forum for researchers and practitioners in the area of computer science education with a focus on secondary schools. The ISSEP series started in 2005 in Klagenfurt and continued in 2006 in Vilnius and in 2008 in Toruń. The 4th ISSEP took part in Zurich. This volume presents 4 of the 5 invited talks and 14 regular contributions chosen from 32 submissions to ISSEP 2010. The ISSEP conference series is devoted to all aspects of computer science teaching. In the preface of the proceedings of ISSEP 2006, Roland Mittermeir wrote: "ISSEP aims at educating informatics properly by showing the beauty of the discipline, hoping to create interest in a later professional career in computing and it will give answers different from the opinion of those who used to familiarize pupils with the basics of ICT in order to achieve computer literacy for the young generation. This is an important message at this time when several countries have reduced teaching informatics to educating about current software packages that change from year to year. The goal of ISSEP is to support teaching of the basic concepts and methods of informatics, thereby making it a subject in secondary schools that is comparable in depth and requirements with mathematics or natural sciences." As we tried to present in our book *Algorithmic Adventures*.
