

Conceptual Model

- ◆ The third kind of model is a conceptual model.
- ◆ Some conceptual models are systems of ideas.
- ◆ Others are based on making comparisons with familiar things to help illustrate or explain an idea.
 - One example of a conceptual model is the system that scientists use to classify living things. By using a system of ideas, scientists can group living things by what they have in common. This type of model allows scientists to better understand each group of living things.
