Diagramming Devotion Jeffrey F. Hamburger, 2020-09-21 During the European Middle Ages diagrams provided a critical tool of analysis in cosmological and theological debates In addition to drawing relationships among diverse areas of human knowledge and experience diagrams themselves generated such knowledge in the first place In Diagramming Devotion Jeffrey F. Hamburger examines two monumental works that are diagrammatic to their core a famous set of picture poems of unrivaled complexity by the Carolingian monk Hrabanus Maurus devoted to the praise of the cross and a virtually unknown commentary on Hrabanus's work composed almost five hundred years later by the Dominican friar Berthold of Nuremberg Berthold's profusely illustrated elaboration of Hrabanus translated

his predecessor's poems into a series of almost one hundred diagrams. By examining Berthold of Nuremberg's transformation of a Carolingian classic, Hamburger brings modern and medieval visual culture into dialogue, traces important changes in medieval visual culture, and introduces new ways of thinking about diagrams as an enduring visual and conceptual model.
