Choosing Equality The Case For Democratic Schooling:

Choosing Equality Ann Bastian, New World Foundation, 1985 **Choosing Equality** Ann Bastian, 1986 Presents a comprehensive critique of education and the reforms covering instruction and the institution *Taking Education Really Seriously* Michael Fielding, 2004-08-02 Michael Fielding looks at what the Labour Government has achieved in the last four years with its policy of education education education There has been widespread disappointment in New Labour's education policies which on the whole have not steered too far wide of those put in place by Margaret Thatcher including issues of marketisation testing and performativity Michael Fielding has called on the key policy thinkers in education to offer their opinions on what has happened in education over the first three to four years of the New Labour Government Education policy is a controversial subject and with a General Election expected within the next few months this book will be read widely by people within education politicians and journalists and by others anxious to get to facts and avoid the spin The subject matter and the presence of so many high profile educationalists make this an essential read **Pedagogy And The Politics Of Hope** Henry Giroux, 2018-02-20 Henry A Giroux is one of the most respected and well known critical education scholars social critics and astute observers of popular culture in the modern world For those who follow his considerably influential work in critical pedagogy and social criticism this first ever collection of his classic writings augmented by a new essay is a must have volume that reveals his evolution as a scholar In it he takes on three major considerations central to pedagogy and schooling The first section offers Giroux's most widely read theoretical critiques on the culture of positivism and technocratic rationality He contends that by emphasizing the logic of science and rationality rather than taking a holistic worldview these approaches fail to take account of connections among social political and historical forces or to consider the importance of such connections for the process of schooling In the second section Giroux expands the theoretical framework for conceptualizing and implementing his version of critical pedagogy His theory of border pedagogy advocates a democratic public philosophy that embraces the notion of difference as part of a common struggle to extend the quality of public life For Giroux a student must function as a border crosser as a person moving in and out of physical cultural and social borders He uses the popular medium of Hollywood film to show students how they might understand their own position as partly constructed within a dominant Eurocentric tradition and how power and authority relate to the wider society as well as to the classroom In the last section Giroux explores a number of contemporary traditions and issues including modernism postmodernism and feminism and discusses the matter of cultural difference in the classroom Finally in an essay written especially for this volume Giroux analyzes the assault on education and teachers as public intellectuals that began in the Reagan Bush era and continues today Henry A Giroux is one of the most respected and well known critical education scholars social critics and astute observers of popular culture in the modern world For those who follow his considerably influential work in critical pedagogy and social criticism this first ever collection of his classic writings augmented by a new essay is a

must have volume that reveals his evolution as a scholar In it he takes on three major considerations central to pedagogy and schooling The first section offers Giroux's most widely read theoretical critiques on the culture of positivism and technocratic rationality He contends that by emphasizing the logic of science and rationality rather than taking a holistic worldview these approaches fail to take account of connections among social political and historical forces or to consider the importance of such connections for the process of schooling In the second section Giroux expands the theoretical framework for conceptualizing and implementing his version of critical pedagogy His theory of border pedagogy advocates a democratic public philosophy that embraces the notion of difference as part of a common struggle to extend the quality of public life For Giroux a student must function as a border crosser as a person moving in and out of physical cultural and social borders He uses the popular medium of Hollywood film to show students how they might understand their own position as partly constructed within a dominant Eurocentric tradition and how power and authority relate to the wider society as well as to the classroom In the last section Giroux explores a number of contemporary traditions and issues including modernism postmodernism and feminism and discusses the matter of cultural difference in the classroom Finally in an essay written especially for this volume Giroux analyzes the assault on education and teachers as public intellectuals that began in the Reagan Bush era and continues today

Unproductive School Choice Debates John Merrifield, Nathan Gray, 2023-05-22 The book explains why we desperately need an Open Education Industry It clearly defines the term and the confusion about what can should be done to improve schooling outcomes and why over 30 years of efforts to improve schooling outcomes has left all 51 US school systems far short of what is needed to engage all

schoolchildren in high value instruction Because of past education failures especially poor basic literacy in economic systems many influential academics and activists have asserted the presence of adequate market forces where key elements of high performing markets are absent and have become pre occupied with discussion of and development of devastating inappropriate generalizations about findings from studies of narrowly targeted restriction laden expansions of access to alternatives to traditional public schools The book compares those to transformational school choice expansions and describes key steps towards the inertia that threatens the future of America as a prosperous and free republic

Strategies for School Equity Marilyn Gittell, 1998-01-01 In the pursuit of a first rate education for all students America's public schools have struggled to achieve fuller racial integration and higher academic standards Yet sharp inequities between prosperous school districts and poorer districts remain reinforced by traditional ways of funding and administering public education This book brings together cutting edge ideas and strategies of prominent advocates of school equity reform Discussing their first hand experiences in forming coalitions framing court cases and dealing with state politics in New Jersey Texas Illinois Michigan Alabama Kentucky and Washington the contributors consider what succeeded and what failed in the search for financial and legal remedies to educational inequity The varied case studies of this book underscore the importance of a comprehensive approach combining finance restructuring and governance reforms for the success of a city or state school reform effort The authors investigate how state constitutions have been used to challenge a state's financial distribution of school aid how business and community organizations have engaged in reform efforts and how others have negotiated legislation to achieve change This discussion of reform strategies will interest not only those who are concerned with excellence and equity in education but also those who wish to form successful coalitions and challenge existing state policies
