Urban Farming Guide for Novice Vincent Bronson,2021-03-12 Urban agriculture is often confused with community gardening homesteading or subsistence farming We re happy to be thought of in such fine company but the fact is that they are very different animals What distinguishes us is that urban agriculture assumes a level of commerce the growing of product to be sold as opposed to being grown for personal consumption or sharing In community gardening there is no such commercial activity You don t have to be a corporation to be an urban farm or have a large tract of land An individual a couple of friends a nonprofit entity or neighborhood group can start and run an urban farm There is no one correct sales outlet for an urban farm Food can be the sold to restaurants or at a farmers market given to a local soup kitchen or church but the food is raised primarily to be moved through some form of commerce from the grower to the user As more of us begin to understand our food system more of us seek to have more input into how food is grown how it is treated after being harvested and how it moves from one place along the food route to another People have begun to understand how far food travels and that they as the consumer have had no say in what is grown or how it is grown Urban agriculture can change that and in doing so it can take a rightful place in the larger food system Urban agriculture has become a means to increase access to locally grown food and a way of reintroducing the public to the many aspects of food that we have lost as a culture How food grows what grows regionally and seasonally are all important lessons and make a better informed urban consumer Urban farms can be the front line of the food system
